Exective Summary

Wood Environment & Infrastructure Solutions Canada Limited (Wood) was retained by 2853972 Ontario Ltd on behalf of Phelps Homes Ltd. (the Client) to complete a Cultural Heritage Impact Assessment (CHIA) for 132 College Street in the community of Smithville, Township of West Lincoln, Niagara Region, Ontario (Study Area). The 1.81-hectare Study Area includes a two-storey schoolhouse known as the 'College Street Public School ' that was constructed between 1885 and 1887 and subsequently altered through large additions built in 1921/1924, 1959, 1967, 1969 and 1972.

The Client intends to develop the Study Area with 138 mixed-use units. Although the property is not listed or designated under the *Ontario Heritage Act*, the Township of West Lincoln has required that a CHIA be prepared as a condition of site plan approval.

The preparation of this CHIA was guided by the Ministry of Heritage, Sport, Tourism and Cultural Industries' (MHSTCI) InfoSheet #5 of the Ontario Heritage Tool Kit, the MHSTCI's Heritage Property Evaluation: A Guide to Listing, Researching, and Evaluating Cultural Heritage Property in Ontario Communities (2006), the Standards & Guidelines for Conservation of Provincial Heritage Properties: Heritage Identification and Evaluation Process (MHSTCI 2014), and the Standards and Guidelines for the Conservation of Historic Places in Canada (Canada's Historic Places 2010).

The heritage evaluation determined that the Study Area has cultural heritage value or interest (CHVI) under *Ontario Regulation 9/06* (O. Reg. 9/06) of the *Ontario Heritage Act* for its historical or associative value. This CHIA also concluded that the heritage integrity of the original schoolhouse was severely compromised through multiple additions between 1921 and 1972. Consequently, the Study Area does not retain physical or design or contextual value and the conservation of its heritage attributes can be achieved through a commemoration and salvage conservation approach.

Based on these conclusions, Wood makes the following recommendations:

- a. Documentation and/or salvaging of the following materials for donation or as a commemorative features within the new development or for display in a local museum/archive:
 - i. Building components that date to the 1885/1887 or 1921/1924 sections of the school:
 - Interior Moulded wood window trim in the 1885/1887 first and second floor classrooms
 - Wood frame windows with moulded surrounds on the third floor
 - Oval window with four lights located on the front façade (west elevation) of the 1885/1887 roof
 - Railings with wood handrails and metal box newel posts/balustrades in stair 001/132/201
 - Red fire door with manufacturers stamp in the 1885/1887 section of the basement
 - Bricks with etched student graffiti in the storage rooms of the 1921/1924 section of the basement
 - ii. Moveable material culture that speaks to the school's history including:
 - School crest in gymnasium

- Wood lectern with school crest in the gymnasium
- Wood mail cubby in the staff room
- Slate chalkboards throughout the school
- Commemorative plaques on the first floor
- Framed qualities in reference to the schools 'Simpson Junior Sportsmanship Trophy'
- School banners
- 'Great Things Are Happening At College St.' sign in the foyer
- Intercom system
- b. Potential inclusion and development of commemorative plaques or place naming strategies.

Glossary

Adjacent lands	Those lands contiguous to a protected heritage property or as otherwise defined in the municipal official plan (Government of Ontario 2020).		
Built Heritage Resource:	Means a building, structure, monument, installation or any manufactured or constructed part or remnant that contributes to a property's cultural heritage value or interest as identified by a community, including an Indigenous community. Built heritage resources are located on property that may be designated under Parts IV or V of the <i>Ontario Heritage Act</i> , or that may be included on local, provincial, federal and/or international registers (Government of Ontario 2020).		
Conserved:	Means the identification, protection, management and use of built heritage resources, cultural heritage landscapes and archaeological resources in a manner that ensures their cultural heritage value or interest is retained. This may be achieved by the implementation of recommendations set out in a conservation plan, archaeological assessment, and/or heritage impact assessment that has been approved, accepted or adopted by the relevant planning authority and/or decision maker. Mitigative measures and/or alternative development approaches can be included in these plans and assessments (Government of Ontario 2020).		

Page viii of 104

Glossary

Cultural Heritage Landscape:	Means a defined geographical area that may have been modified by human activity and is identified as having cultural heritage value or interest by a community, including an Indigenous community. The area may include features such as buildings, structures, spaces, views, archaeological sites or natural elements that are valued together for their interrelationship, meaning or association. Cultural heritage landscapes may be properties that have been determined to have cultural heritage value or interest under the <i>Ontario Heritage</i> <i>Act</i> , or have been included on federal and/or international registers, and/or protected through official plan, zoning by-law, or other land use planning mechanisms (Government of Ontario 2020).
Heritage Attributes:	Means the principal features or elements that contribute to a protected heritage property's cultural heritage value or interest, and may include the property's built, constructed, or manufactured elements, as well as natural landforms, vegetation, water features, and its visual setting (e.g., significant views or vistas to or from a protected heritage property) (Government of Ontario 2020).
Protected Heritage Property:	Means property designated under Parts IV, V or VI of the <i>Ontario</i> <i>Heritage Act</i> ; property subject to a heritage conservation easement under Parts II or IV of the <i>Ontario Heritage Act</i> ; property identified by the Province and prescribed public bodies as provincial heritage property under the <i>Standards and Guidelines for Conservation of</i> <i>Provincial Heritage Properties</i> ; property protected under federal legislation, and UNESCO World Heritage Sites (Government of Ontario 2020).
Significant:	In regard to cultural heritage and archaeology, resources that have been determined to have cultural heritage value or interest. Processes and criteria for determining cultural heritage value or interest are established by the Province under the authority of the <i>Ontario Heritage Act</i> (Government of Ontario 2020).

1.0 Introduction

1.1 Description and Location of Property

Wood Environment & Infrastructure Solutions Canada Limited (Wood) was retained by 2853972 Ontario Ltd on behalf of Phelps Homes Ltd. (the Client) to complete a Cultural Heritage Impact Assessment (CHIA) for 132 College Street in the community of Smithville, Township of West Lincoln, Niagara Region, Ontario (Study Area) (Figure 1 and Figure 2). The L-shaped, 1.81-hectare (4.4 acre) Study Area is bounded by Morgan Street on the north, residential properties on the east and south, and College Street on the west. The Study Area includes a two-storey schoolhouse known as the 'College Street Public School' that was constructed between 1885 and 1887 and subsequently altered through large additions built in 1921/1924, 1959, 1967, 1969 and 1972.

The Client intends to develop the Study Area with 138 mixed-use units, including 12 townhouses fronting on Morgan Avenue, six live/work units fronting on College Street, and 120 stacked townhouses in the interior of the lot. Although the property is not listed or designated under the *Ontario Heritage Act*, the Township of West Lincoln requested that a CHIA be prepared as a condition of site plan approval.

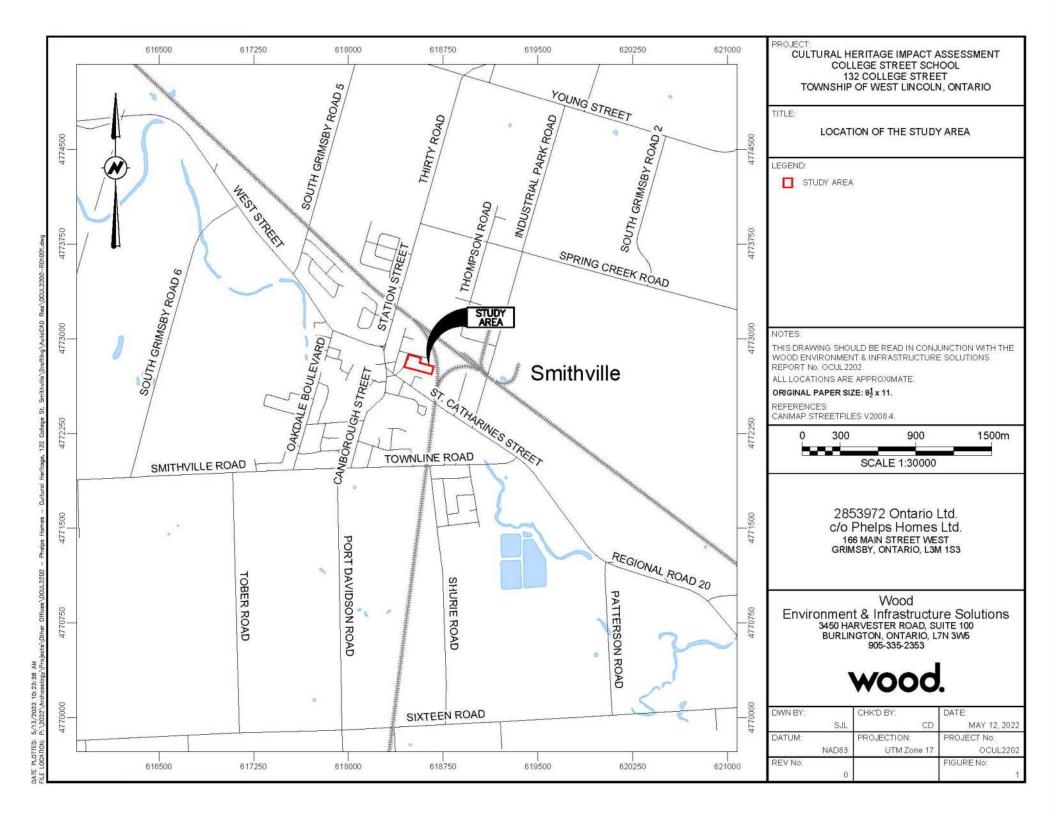

The preparation of this CHIA was guided by the Ministry of Heritage, Sport, Tourism and Cultural Industries' (MHSTCI) InfoSheet #5 of the Ontario Heritage Tool Kit, the MHSTCI's Heritage Property Evaluation: A Guide to Listing, Researching, and Evaluating Cultural Heritage Property in Ontario Communities (2006), the Standards & Guidelines for Conservation of Provincial Heritage Properties: Heritage Identification and Evaluation Process (MHSTCI 2014), and the Standards and Guidelines for the Conservation of Historic Places in Canada (Canada's Historic Places 2010).

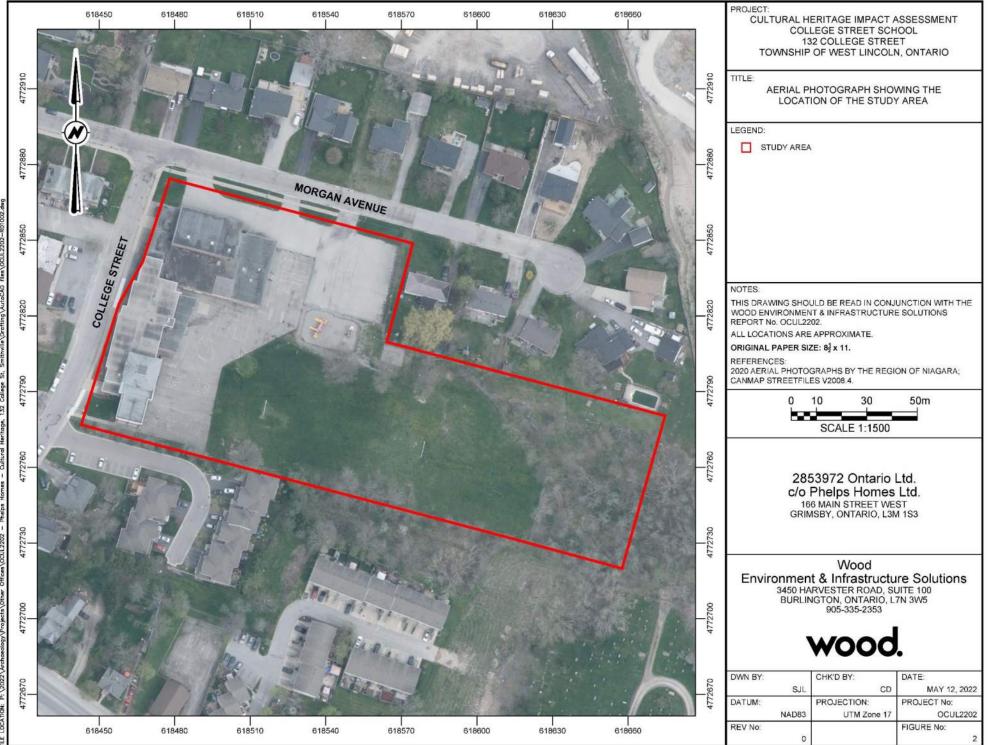

1.2 Objectives and Tasks

To complete this CHIA, Wood:

- Undertook background research, including consultation of primary and secondary sources and review historical maps/aerial imagery to gain an understanding of the historical evolution of the Study Area;
- Collected online data and made agency information requests to the Township of West Lincoln, Ontario Heritage Trust, MHSTCI, West Lincoln Historical Society, and West Lincoln Public Library to gather information of the subject property to aid in determining the cultural heritage significance of the Study Area;
- Conducted a field investigation to establish the existing conditions of the Study Area, assess built heritage resources, cultural heritage landscape components, and identify heritage attributes (if warranted);
- Evaluated the Study Area using the criteria prescribed in *Ontario Regulation 9/06* (O. Reg. 9/06) of the *Ontario Heritage Act* and drafted a statement of Statement of Cultural Heritage Value or Interest (SCHVI);
- Assessed the potential direct and indirect impacts of the proposed development on the CHVI and heritage attributes of the Study Area; and,
- Recommended mitigation measures and a conservation approach to avoid or reduce the negative impacts.

PLOTTED: 5/13/2022 10:52:28 AM .0CATION: P:\2022\Archaeology\Pro DATE

2.0 Methodology

2.1 **Regulatory Requirements**

The requirements to consider cultural heritage under the Planning Act process are found in the *Provincial Policy Statement* (PPS) (Government of Ontario 2020) and the *Ontario Heritage Act*, R.S.O. 1990, c. O.18 (Government of Ontario 1990).

2.1.1 Provincial Policy Statement

The PPS provides policy direction on matters of provincial interest related to land use planning and development (Government of Ontario 2020:1). The PPS is applicable to the entire Province of Ontario. Under the PPS, the conservation of cultural heritage is identified as a matter of provincial interest. Section 2.6 of the PPS gives direction on the consideration of cultural heritage and archaeology (Government of Ontario 2020:31). Specifically, the following direction is given regarding built heritage resources, cultural heritage landscapes, and protected heritage properties:

2.6.1 Significant built heritage resources and significant cultural heritage landscapes shall be conserved.

2.6.3 Planning authorities shall not permit development and site alteration on adjacent lands to protected heritage property except where the proposed development and site alteration has been evaluated and it has been demonstrated that the heritage attributes of the protected heritage property will be conserved.

2.6.5 Planning authorities shall engage with Indigenous communities and consider their interests when identifying, protecting and managing cultural heritage and archaeological resources.

(Government of Ontario 2020)

2.1.2 Ontario Heritage Act

The Ontario Heritage Act, R.S.O. 1990, c. O.18 enables municipalities and the provincial government to protect heritage properties and archaeological sites (Government of Ontario 1990). The Ontario Heritage Act includes two regulations for determining Cultural Heritage Value or Interest (CHVI): Ontario Regulation (O. Reg. 9/06) and O. Reg. 10/06. O. Reg. 9/06 provides criteria to determine the CHVI of a property at a local level while O. Reg. 10/06 provides criteria to determine if a property has CHVI of provincial significance.

For this study, O. Reg. 9/06 was used. The criteria for determining CHVI under O. Reg. 9/06 are:

- 1. The property has design value or physical value because it,
 - i. is a rare, unique, representative or early example of a style, type, expression, material or construction method,
 - ii. displays a high degree of craftsmanship or artistic merit, or
 - iii. demonstrates a high degree of technical or scientific achievement.
- 2. The property has historical value or associative value because it,
 - i. has direct associations with a theme, event, belief, person, activity, organization or institution that is significant to a community,

- ii. yields, or has the potential to yield, information that contributes to an understanding of a community or culture, or
- iii. demonstrates or reflects the work or ideas of an architect, artist, builder, designer or theorist who is significant to a community.
- 3. The property has contextual value because it,
 - i. is important in defining, maintaining or supporting the character of an area,
 - ii. is physically, functionally, visually or historically linked to its surroundings, or
 - iii. is a landmark.

(Government of Ontario 2006a)

2.1.3 Township of West Lincoln Official Plan

The <u>Official Plan of the Township of West Lincoln</u> (Official Plan) was consolidated in July 2021. The purpose of the Official Plan is to provide detailed development and land use policies and to direct and guide development within the Township (Township of West Lincoln 2021). Policies and guidelines regarding heritage conservation are included in Section 8 of the Official Plan. Policies relevant to new development include:

8.3.2 In reviewing proposals for the addition to, demolition or removal of designated buildings and structures or the alteration of existing buildings, the Township will be guided by the following general principles:

a) heritage buildings, associated landscape features and archaeological sites including their surroundings should be protected from any adverse effects of change;

b) original building fabric and architectural features such as doors, windows, mouldings, verge boards, walling materials and roofs should be retained and repaired rather than replaced wherever possible;

c) new additions and features should generally be no higher than the existing building and wherever possible be placed to the rear of the building or set back substantially from the principle façade.

(Township of West Lincoln 2021a)

The Study Area is not listed on the Township of West Lincoln's heritage register nor designated under Part IV of the *Ontario Heritage Act*. Rather, the Study Area was identified by Township planning staff as having *potential* CHVI.

2.1.4 Niagara Region Official Plan

In April 2022 Niagara Region proposed an update to the Niagara Region Official Plan. The proposed plan intends to provide detailed development and land use policies to direct and guide development within Nagara Region. Proposed policies and guidelines regarding heritage conservation within the new plan are included in <u>Chapter 6 – Vibrant Region</u> of the Official Draft Plan. Policies relevant to new development include:

6.4.1.5 Development and site alteration on protected heritage property or adjacent lands shall not be permitted, except where the proposed development and site alteration has been evaluated through a heritage impact assessment and it has been demonstrated that the heritage attributes of the

OCUL2202| June 2022

Page 4 of 104

protected heritage property will be conserved

(Niagara Region 2022: 22)

2.2 **Guidance Documents**

The Ministry of Heritage, Sport, Tourism and Culture Industries (MHSTCI) is responsible for the administration of the *Ontario Heritage Act* and has developed checklists, information bulletins, standards and guidelines, and policies to support the conservation of Ontario's cultural heritage resources, including built heritage resources, cultural heritage landscapes, and archaeological sites.

The MHSTCI released the *Ontario Heritage Tool Kit* in 2006, which is a series of guidelines that outline the heritage conservation process in Ontario. Two volumes from the *Ontario Heritage Tool Kit* were used to guide the preparation of this CHIA, including:

- Heritage Property Evaluation: A Guide to Listing, Researching, and Evaluating Cultural Heritage Property in Ontario Communities (MHSTCI 2006a)
- Heritage Resources in the Land Use Planning Process, InfoSheet #5, Heritage Impact Assessments and Conservation Plans (MHSTCI 2006b)

Also used to guide the preparation of this CHIA was the MHSTCI guide entitled *Standards and Guidelines for Conservation of Provincial Heritage Properties: Heritage Identification & Evaluation Process* (MHSTCI 2014) provides detailed direction on the completion of O. Reg. 9/06 evaluations.

2.3 Background Research

Background research was carried out to gain a thorough understanding of the historical context of the Study Area. Primary sources, secondary sources, historical maps, and aerial photographs were consulted, as appropriate, to identify historical themes relevant to the Study Area. Specifically, research regarding the physiography, survey and settlement, and 19th and 20th century land use of the Study Area was completed. A review of historical mapping and aerial photographs was also conducted to identify settlements, structures, and landscape features within, and adjacent to, the Study Area. Historical maps from 1862, 1876, 1907, 1929, 1938, 1964, 1968 and 1996 were reviewed. In addition, recent and historic aerial photographs from 1934, 1954, 1965, 2000 and 2018 as well as Google Earth imagery were reviewed to identify changes within, and adjacent to, the Study Area.

The results of the background research are presented in Section 3.0 of this report.

2.4 Community Consultation

Community consultation was carried out to gather background information and local perspectives on the Study Area. For this CHIA, the Township of West Lincoln, Ontario Heritage Trust, MHSTCI, West Lincoln Historical Society, and West Lincoln Public Library were contacted directly via email and/or phone to confirm the heritage status of the property and gather background information to inform the heritage evaluation.

The results of the community consultation activities are presented in Section 4.1 of this report.

2.5 Field Review

A field review of the Study Area was completed on April 14, 2022, by Wood Cultural Heritage Specialists Chelsea Dickinson and Heidy Schopf. The purpose of the field review was to establish the existing

conditions and identify potential heritage attributes in the Study Area. Weather conditions were sunny and warm and access to the building interior was provided by the Client. Photographic documentation of the Study Area and its spatial context was completed.

The results of the field review are presented in Section 4.2 of this report.

2.6 Cultural Heritage Evaluation

The scope of work for this CHIA included an evaluation of the Study Area to determine if it met the criteria for CHVI prescribed in O. Reg. 9/06 of the *Ontario Heritage Act*. The Study Area is considered to have potential CHVI but is not listed on the Township of West Lincoln's heritage register nor designated under Part IV of the *Ontario Heritage Act*.

The results of the O. Reg. 9/06 evaluation are provided in Section 4.2.5.2.1 of this report.

2.7 Impact Assessment

An impact assessment is required when a study area evaluated to have CHVI is anticipated to be directly or indirectly affected by a new development. InfoSheet#5 of *Heritage Resources in the Land Use Planning Process: Cultural Heritage and Archaeology Policies of the Ontario Provincial Policy Statement* (MHSTCI 2006b) provides guidance to assess the following direct and indirect impacts that may occur when development is proposed within, or adjacent to, a heritage property:

- Direct Impacts
 - Destruction of any, or part of any, significant heritage attributes or features
 - Alteration that is not sympathetic, or is incompatible, with the historic fabric and appearance
- Indirect Impacts
 - Shadows created that alter the appearance of a heritage attribute or change the viability of a natural feature or plantings, such as a garden
 - Isolation of a heritage attribute from its surrounding environment, context or significant relationship
 - Direct or indirect obstruction of significant views or vistas within, from, or of built and natural features
 - A change in land use such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in formerly open spaces
 - Land disturbances such as a change in grade that alters soils and drainage patterns that adversely affect an archaeological resource.

2.8 Mitigation Measures

When impact assessment determines that the new development will negatively affect the CHVI and heritage attributes of a study area, mitigation measures are required. MHSTCI InfoSheet#5 presents the following general strategies to minimize or avoid negative impacts to cultural heritage resources:

• Alternative development approaches

- Isolating development and site alteration from significant built and natural features and vistas
- Design guidelines that harmonize mass setback, setting, and materials
- Allowing only compatible infill and additions
- Reversible alterations
- Buffer zones, site plan control, and other planning mechanisms

In addition to the mitigation measures contained in InfoSheet#5, general standards for preservation, rehabilitation, and restoration are found in the *Standards and Guidelines for the Conservation of Historic Places in Canada* (CHP S&Gs) (Canada's Historic Places 2010:22). The CHP S&Gs are widely accepted as the guiding document for heritage conservation in Canada and contain general conservation standards and guidelines that are specific to cultural heritage resource types such as buildings, engineering works, and cultural heritage landscapes. Where applicable, guidelines from the S&Gs were used in this CHIA to recommend mitigation measures that are specific to a resource type.

3.0 Historical Context

To gain a thorough understanding of the history of the Study Area, a review of the physiography, survey and settlement, and 19th and 20th century land use was completed. A review of historical mapping and aerial photographs were also conducted to identify settlements, structures, and landscape features within, and adjacent to, the Study Area.

3.1 Physiography

The Study Area is situated in the Haldimand Clay Plain physiographic region, an area of about 1,350 square miles made up of a series of parallel clay belts that were once submerged in Glacial Lake Warren. The highest ground adjoins the Niagara Escarpment and the drainage of this belt is controlled by modest ridges which directs it eastwards via parallel streams, the most important of which is Twenty Mile Creek, Forty Mile Creek and the Welland River (Chapman and Putnam 1984). The 1935 *Soil Survey of County of Lincoln* (Canadian Department of Agriculture 1935) indicates that the dominant surface soil types within the Study Area is Haldimand Clay with imperfect drainage. The later 1989 *Generalized Soil Map Regional Municipality of Niagara Ontario* (Ministry of Agriculture and Food 1989) identified the area of the Study Area as urban lands and so did not comprehensively map the natural soil conditions.

The Study Area is located approximately 370 m north from the Twenty Mile Creek.

3.2 Indigenous Land Use

The history of Indigenous peoples in Southern Ontario spans thousands of years. The following synopsis therefore provides only a brief summary of this extensive time span but aims to illustrate the major developments in Indigenous life as revealed through oral history, archaeology, and ethnohistory. In this summary, "culture" —the term archaeologists use to describe a shared material culture that identifies a time period or group— is substituted with "way of life" to reflect the direct Indigenous lineage from those living in the earliest periods to the present day (Julien *et al.* 2010).

The cultural history of southern Ontario begins after the end of the Wisconsin Glacial Period, approximately 11,000 years ago. The earliest people to move into what is now Ontario followed what archeologists refer to as the Paleo way of life with small, highly mobile groups taking advantage of seasonally available resources and following the migration patterns of large mammals, including now extinct megafauna.

As the climate changed and people following a Paleo way of life grew familiar with their surroundings, they developed local adaptions around 9,500 years ago known as the Archaic way of life. Seasonal mobility continued, but more emphasis was placed on adapting to smaller territories and broadening the resource base. The archaeological record suggests that in general the social structures of Archaic people became increasingly complex, with Late Archaic archaeological sites showing evidence of exchange networks stretching as far away as the Mid-Atlantic as well as defined cemeteries with individuals buried with varied grave goods, indicative of a stratified society (Ellis and Ferris 1990).

The transition from an Archaic to Woodland way of life is marked by the introduction of ceramics. While hunter-gathering continued as the primary economy among some groups, others adopted agriculture and lived in large, sedentary villages and established broad trade networks. By the time of contact with Europeans, Southern Ontario was a culturally dynamic area, populated by distinct Iroquoian and Algonkian-speaking groups (Englebrecht 2003; Trigger 2000; Schmalz 1991). The Study Area is located

approximately 370 m north from the Twenty Mile Creek which would have acted as significant factor influencing and supporting traditional land use activities such as fishing and hunting, travel and trade routes and land use patterns and settlements (ASI and LHC 2021: 30).

In the late 1700s, the British colonial regime entered into a series of treaties with the Indigenous Nations in Canada. While these treaties were intended as formal legally binding agreements that would set out the rights, responsibilities and relationships between the First Nations and the federal and provincial governments, the government of Ontario acknowledges that Indigenous nations may have different understandings of the treaties (Government of Ontario 2022, Historic Canada 2021). As French and British colonization intensified from the 18th century onwards, Indigenous ways of life have adapted to change in complex and varied ways.

The Study Area is situated within the boundaries of the Between the Lakes Purchase signed on December 7, 1792, by the British Crown and representatives of certain Mississauga Anishnaabe peoples. The Between the Lakes Purchase included the land between the Lakes of Ontario and Erie. To clarify uncertainties with the description of the lands from the original purchase signed in 1792, Treaty No. 3 was drafted (Government of Ontario 2022). A full transcript of the Between the Lakes Purchase can be found within the Government of Canada's Treaty Texts - Upper Canada Land Surrenders, specifically the <u>Between the Lakes Purchase and Collins Purchase, No. 3</u> (Government of Canada 2016). To recognize and honour the municipality's Indigenous heritage and land rights, the Township of West Lincoln has developed the following land acknowledgement:

"On behalf of the Members of Committee/Members of Council and staff, we wish to acknowledge this land on which the Township of West Lincoln operates. The land on which we gather is the traditional territory of the Haudenosaunee and Anishinaabeg peoples and is still home to many Indigenous people today. We are grateful to have the opportunity to work here today and to follow the Haudenosaunee system of blending laws and values and the Anishinaabe beliefs to strive to live in harmony and balance throughout the Municipality. We acknowledge that we are all treaty people and accept our responsibility to honour all our relations."

(Township of West Lincoln 2021b).

3.3 Township Survey and Settlement

During the British colonial period, the Study Area was surveyed as within Lot 7 Concession 9 in the Geographic Township of Grimsby, Lincoln County.

3.3.1 Lincoln County

Lincoln County was formed in 1792 as was named by Lieutenant Governor John Graves Simcoe after the County of Lincolnshire in England (Rayburn 1997: 193). By the late 1800s, Lincoln County was comprised of the Townships of Grimsby, Clinton, Louth, Grantham, Niagara, Caistor and Gainsborough. In 1970, the Township of West Lincoln was formed by merging the Town of Beamsville, Township of Clinton, and part of the Township of Louth. That same year Lincoln County became part of the Regional Municipality of Niagara (Niagara Region) (Rayburn 1997: 193).

3.3.2 Grimsby Township

The Township of Grimsby was named for a town of the same name in Lincolnshire. The township measured approximately 146 square kilometres and was bounded by the townships of Clinton and

Gainsboro to the east, the Township of Caistor to the south, the townships of Binbrook and Saltfleet in Wentworth County on the west, and Lake Ontario to the north. Grimsby was further divided into the municipal townships of North and South Grimsby (Rayburn 1997: 144).

A significant water source in the Township of Grimsby was the Twenty Mile Creek, otherwise known as the River Jordan, and Forty Mile Creek. The general topography in 1876 was identified as gently sloping from the base of Mount Dorchester to Lake Ontario while the land near Twenty Mile creek was described as a mix between rolling or gently sloping topography. Some identified local plant species from the area as documented in 1876 included pine, oak, chestnut, sassafras, wild grapes and plums, crab apples and various berries (Page 1876).

Some of the early documented settlers to the Grimsby area include John Green and several members from the Nelle family including Captain Roberts, Abraham, and William who arrived in 1783, and the Petitt, Smith, Walker, and Nixon families who arrived between 1784 and 1790 (Page 1876:10). The first mills were built by John Green and a grist and saw mill were built by Nathaniel Griffin in 1794. Church of England religious services in Grimsby were initially at the residence of Judge Pettitt in 1787, but formal churches later included a log structure built in 1794 and a stone building erected in 1812. The second and third churches within the township were located in the settlement of Smithville (Page 1876: 10).

The first school in the township was situated east of the Village of Grimsby and built in log in 1794. Later the same year, two other schools were built in the township, one in the settlement of Smithville and the other led by teacher John French (Page 1876: 10). Schools were also built in 1810 near Bonslaugh, in 1818 in the Merritt settlement, and in 1817 in Wolverton (Page 1876: 10).

By 1876, Grimsby had a total of 14 public schools, two high schools, two or three private schools, and 15 churches: five Methodist; two Methodist Episcopal; two Roman Catholic; and houses of worship for each of the Church of England, Presbyterian, Baptist, Universalist, Disciple, Union denominations (Page 1876: 10). Prominent settlements included the former Village of Grimsby (previously known as the Forty) and Smithville, where the Study Area is located (Page 1876: 10; Rayburn 1997: 144). In 1876, Smithville had a population 700 (Page 1876: 10).

In 1970, North Grimsby merged with the Town of Grimsby and the South Grimsby Township was annexed by West Lincoln Township (Rayburn 1997: 144).

3.3.3 Smithville

Smithville, in the south part of the former Grimsby Township, was initially called Griffinville in honour of Richard Griffin, a Welshman who had arrived via New York in 1787. Born on June 22, 1732, Richard Griffin took up occupations as a teacher, farmer and miller in Smithville and married Mary Smith, the daughter of Judge Abraham Smith. The couple later had twelve children (Griffin 1923: 29)

Plate 1: Oil painting reproduction depicting Smith Griffin (Griffin 1924: 28)

One of Richards sons, Smith Griffin, became a prominent member of the community and is credited with renaming the settlement to 'Smithville' to honour his mother. Smith built the first store and grist mill and operated a carding mill and ashery (Page 1876: 10; Rayburn 1997: 320; Griffin 1924: 34-36). He also established a road to Jordan Village and as Captain in the 4th Regiment fought in the Battle of Lundy's Lane on July 25, 1814 during the War of 1812 (Griffin 1924: 34-36). Additionally, Smith was a Methodist minister, though he never entered into the itinerancy. Reverend John Carrol's 1867 *Case and his Contemporaries* describes Smith as follows:

"One of these was Smith Griffin, Esq., grand-father of the Rev. Wm-S. Griffin, of the Wesleyan Conference. He resided at Smithville, which took its cognomen from his baptismal name. He was farmer, mill-owner, merchant and preacher, all in one. His multifarious worldly engagements seemed not to abate his zeal and activity in the cause of God. He was once heard to say that he 'had too much of his own business to attend to, to occupy himself with any of Satan's work.' Although intensely busy on week days with secular engagements, he went far and near on the Lord's day to preach. He was distinguished for liberality in advancing the cause of God."

(Carrol 1867: 302).

Following the construction of the Welland Canal, Smith acted as one of three commissioners appointed by the government to adjust land claims in connection with the area's overflow lands (Griffin 1924: 34). Smith's first wife was Eleanor Collver (or Culver), who died in 1812; two years later Smith remarried, this time to Harriet Douglas. Harriet passed away in October 1847 and Smith died two years later on Sept. 28, 1849.

Other early settlers to the Smithville area were Charles Meredith, Thomas Harris, Thomas North,

Page 11 of 104

Lieutenant Monroe, Soloman Hill, Colonel Robert Nelles, William Crooks, Dennis Woolverton and Abraham Nelles, the latter called to legislative council in 1830 (Page 1876: 10).

During the 19th century, Smithville had five churches, a high school and public school, two halls, a Mechanics Institute, three hotels, one grist mill, multiple factories, and various merchants and stores, and reached the status of police village by 1887 (Page 1876: 10). However, the population of Smithville remained surprisingly static from the late 19th to early 20th centuries; in 1876 there were 700 inhabitants while in 1912 this number had only risen by 50 (Page 1876: 10; Mika and Mika 1987: 179; Rayburn 1997: 320). Photographs from the early 20th century show the small community organized around the intersection of Griffin Street South and Highway 20 (Plate 2).

Smithville's first school, built in 1795, was in operation until the mid 1800s and was led by Peter Pitcher then Doctor Gilbert Field and Reverend Bartram (Page 1923: 52; Boerema 2022). A second school was built in 1830 between Smithville and the hamlet of Middleport and taught by numerous teachers including Sarah Burkholder, Ann Field (Mrs. Hugh Bridgman), Eliza Dalton and Florella Morse. Private schools at this time were held in either the homes of the parents or in the old Court House.

Between 1830 and 1850 a three-room, two-storey frame school was built in Smithville and until 1885 served as a public school in the lower two rooms and a high school the upper room. Its first principal of was Fred Eastman (Page 1923: 53; Boerema 2022). Between 1885 and 1887, Smithville built their first high school in Study Area (see Section 3.5).

3.4 Review of Historical Mapping and Aerials

Historical mapping and aerials were examined to gain an understanding of 19th to 21st century land use of the Study Area and surrounding landscape. A summary of these historical records is presented below in Table 1.

3.5 **Property History**

3.5.1 Land Registry Data

The original Land Patent for Lot 7 Concession 9 in Smithville was granted to Charles Meredith on June 22, 1796. In 1806, it passed from Meredith to Smith Griffin. The parcel exchanged hands several more times throughout the 19th century though the deed records are unclear. In 1851, "Henry H." sold the land to Catherine French, wife of John N. French (the name listed as property owner on the 1876 map). In 1857 the wife of John N. French, presumably still Catharine, sold the land to Moses H. Counsbury, who would sell the property again in 1906 to Helen Roberts. After 1906, the property was transferred to Joseph Rethazy and Roy M. McCollum before being sold to the Corporation of the Township of Grimsby in 1958. Twenty years later, the Public School Board of the Township School Area of West Lincoln placed an application for the property. In 2014, an application to consolidate was granted from the District School Board of Niagara to the client.

The land registry data for 132 College Street is transcribed below in Table 2 and a full copy of the abstract parcel data provided in Appendix B.

Table 2: Land Registry Data for Part of Lot 7, Concession 9, Grimsby Township, Lincoln County

3.5.2 College Street Public School

The College Street Public School was constructed between 1885 and 1887 as Smithville's first purposebuilt high school. The school taught compulsory subjects including arithmetic, algebra, euclid, English, English composition, grammar, literature and dictation, history, and geography and offered several elective subjects including natural philosophy, chemistry, bookkeeping, French, Latin grammar, Greek, and "Caesar", "Cicero", and "Virgil".

As the only high school in the area, it drew students from neighboring counties including Welland and Haldimand, who paid fees of \$2.00 per month to be enrolled. These students were boarded in the Smithville during the school week. In 1890, enrollment at the school was 74 and overseen by Mr. James Tremeer as principal. To graduate, students were required to complete Senior, Junior and Primary Leaving Examinations which cost \$5.00. In 1898, the high school was had only two teachers and a caretaker, who was the only employee on a 12 month salary.

In 1913, the school's first recorded curricular activity group was formed. Known as the Excelsior Literary Society, their motto was "per aspera ad alta", which translates to "through difficulties to success", and their colours were purple and gold.

The original structure was a three-storey structure with three rooms. It survives as the core of the current school with only its rear or east elevation still visible. The first addition was built between 1921 to 1924 and included two rooms, one of which was a laboratory for teaching science. This was deemed a significant improvement as prior to this addition zoology and botany had limited storage facilities and had to rely on insect and weed collections obtained during the autumn months (Appendix C; Boerema 2022). Later additions to this school occurred in the years 1959, 1967, 1969 and 1972. Commemorative plaques in the Study Area identifies L. M. Huget, B. Arch as the architect for the 1967 and 1969 additions. L. M. Huget name was found in the 1955 Royal Architectural Institute of Canada membership list as accredited by the Ontario Association of Architects (OAA) and based out of Hamilton (RAIC 1955).

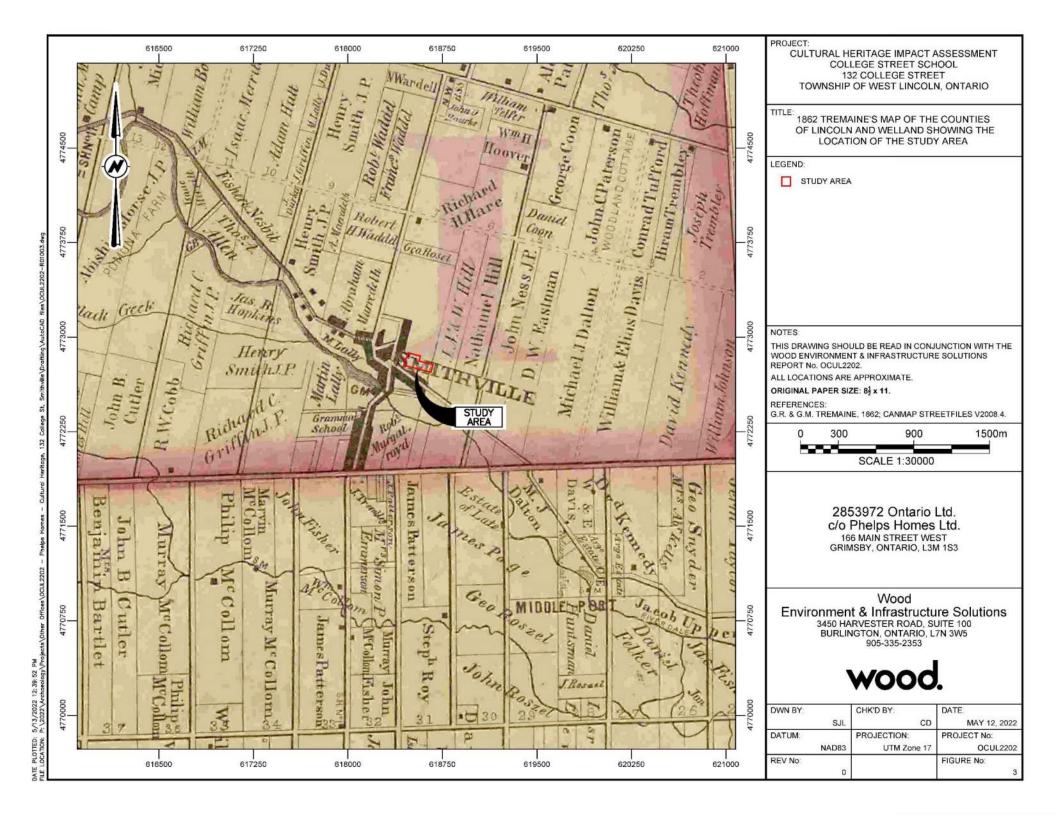

The 1959 addition significantly altered the main entrance and front façade by adding a principal and secretary's office and expanded the structure northwards to include three additional classrooms and two public washrooms. The 1967 addition consisted of two classrooms, one of which was a large L-shaped kindergarten classroom and a work room. The 1969 addition extended the structure further north to include a staff room and a second entrance with foyer. The 1969 addition also included a gymnasium with a mezzanine/stage, a library, and two public changerooms. The final addition in 1972 added three additional classrooms on the northeast corner of the building.

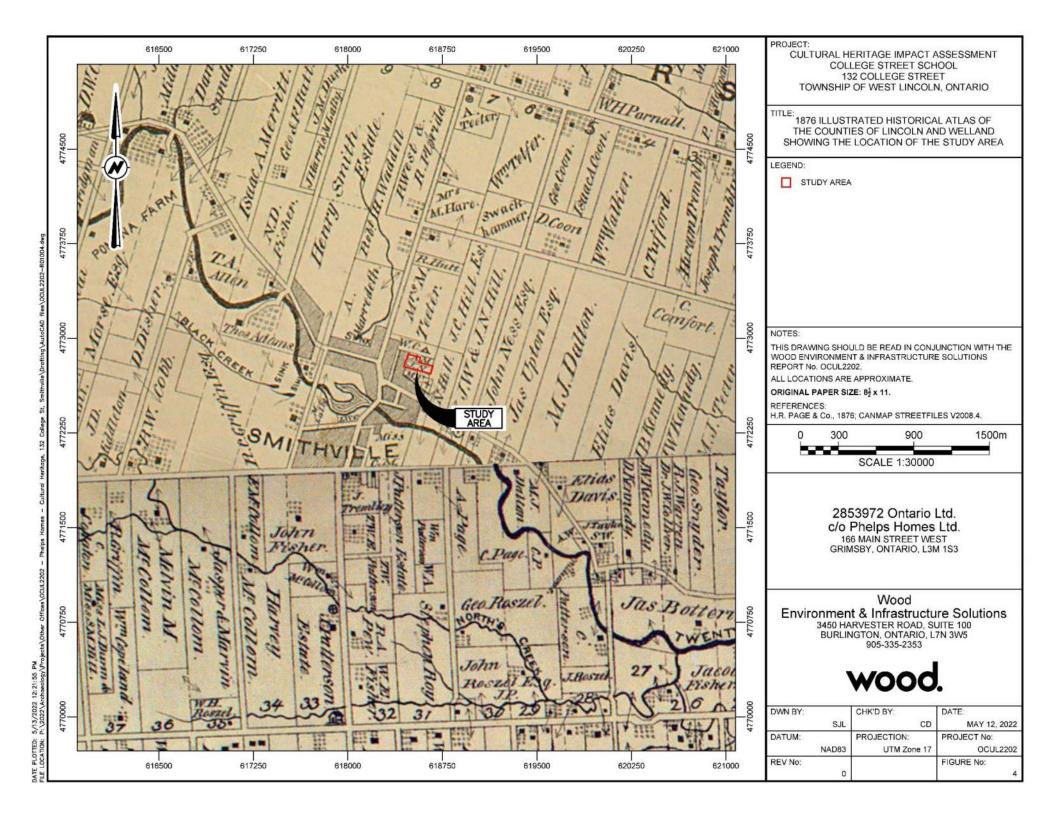

The College Street Public School closed before 2019, when the Township initiated studies to rezone the Study Area as High Density Residential (Township of West Lincoln 2020).

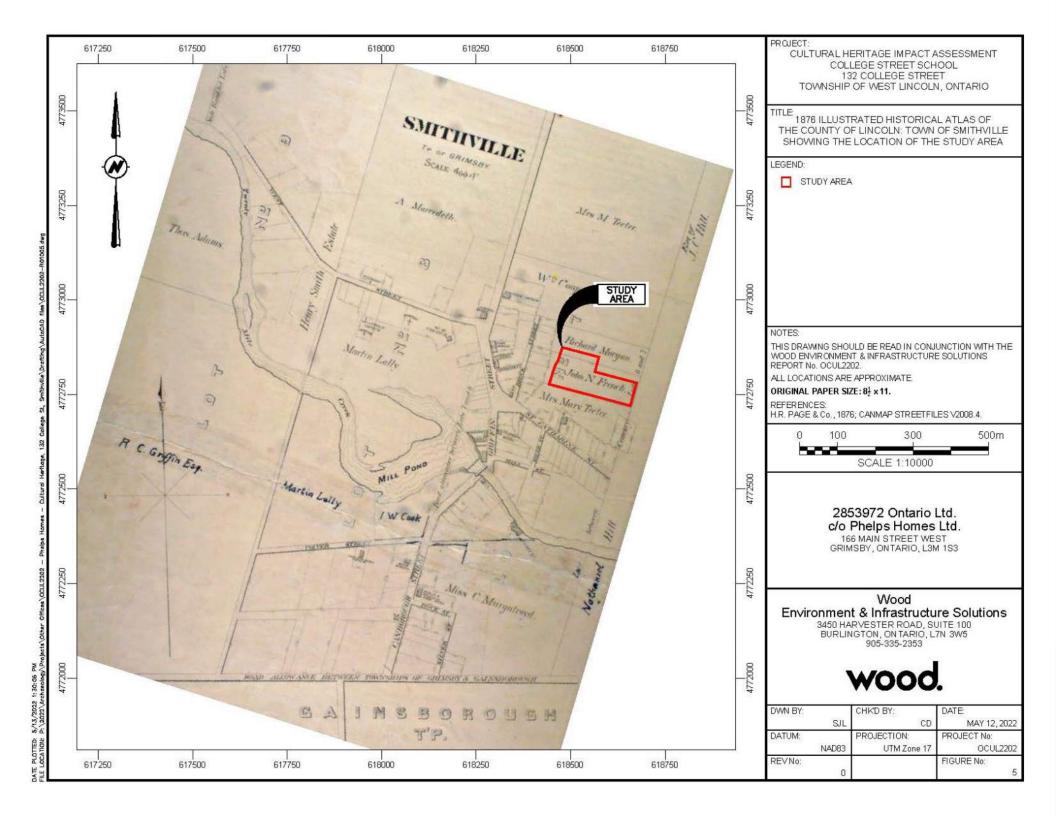

3.5.3 Summary of Property History

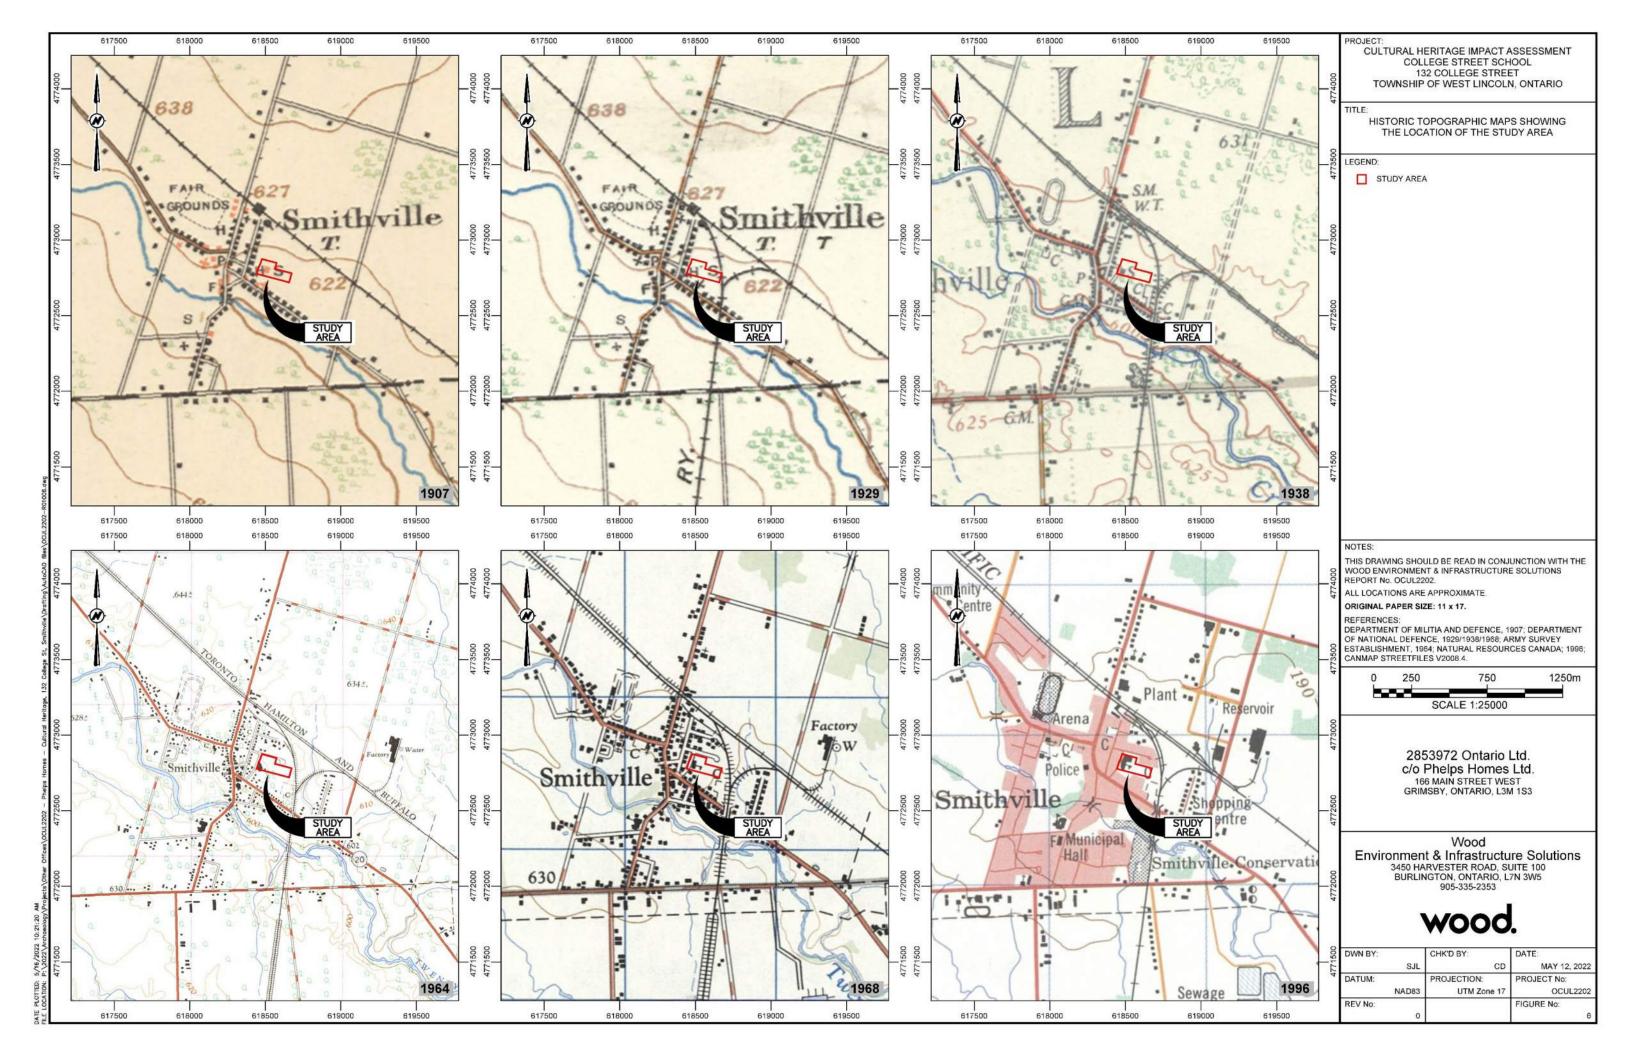

Historic mapping, land registry data, and city directory information indicate the "College Street Public School" in the Study Area was originally constructed between 1885 and 1887 as Smithville's first high school. Several new sections were added in the 20th century. In 1954, a new high school was constructed in Smithville and the Study Area became a primary school. The 1959 addition was constructed to include a kindergarten classroom to support this use. Additions were subsequently added in 1967, 1969, and 1972 to accommodate the primary school population of Smithville during the second half of the 20th century. The College Street Public School was closed prior to 2019 (Township of West Lincoln 2020).

4.0 Existing Conditions

4.1 Information Gathering

The Township of West Lincoln, Ontario Heritage Trust, MHSTCI, the West Lincoln Historical Society, West Lincoln Public Library and current property owner were consulted to gather information on the Study Area.

Gerrit Boerema, Planner II at the Township of West Lincoln, forwarded background information on the Study Area from the West Lincoln Historical Society, and provided a copy of the Township's Heritage Registry for designated properties. At time of writing, a follow-up request regarding the presence or absence of listed heritage properties in the vicinity of the Study Area has not been answered.

No response was received from the Ontario Heritage Trust at the time of writing this report.

Karla Barboza, Acting Team Lead at the MHSTCI, reported that there are no provincial heritage properties designated under the *Ontario Heritage Act* by the Minister within, or adjacent to, the Study Area.

Loraine Drilling, Supervisor of Administrative Services at West Lincoln Public Library, recommended the use of their inter-library loan services to review potential resources with pertinent background information related to Smithville.

Communication from the West Lincoln Historical Society confirmed that the original structure was built between 1885 and 1887 with the first addition later built between 1921 and 1924. This is despite a map in possession of the current property owner that indicated original construction of the building in 1921. The earlier data is also supported by the results of the field review, which identified two distinct structural footprints/window stylings within what the map identifies as the original 1921/1924 structure. The results of fieldwork are discussed in further detail in the following sections.

4.2 Field Review Results

A field review of the Study Area was completed on April 14, 2022, by Wood Cultural Heritage Specialists Chelsea Dickinson and Heidy Schopf. The purpose of the field review was to establish the existing conditions of the Study Area and identify any heritage attributes in the Study Area. Access to the building interiors was provided by the client and weather conditions during the field review were sunny and warm.

4.2.1 Location Context

The Study Area borders the single lane (one in each direction) Morgan and College Streets, and residential properties on the east and south. The residences along Morgan Street were constructed in the mid- to late 20th century and include bungalows and ranch-style detached houses (Plate 3 and Plate 4). The mid-to late 20th century character of the residential neighbourhood continues the east side of 132 College Street where several residential backyards and a woodlot are located (Plate 5 and Plate 6). On the south the Study Area is bordered by a recent residential development (124 College Street Estates) (Plate 7). College Street, located on the west side of the Study Area, includes a mix of residential and commercial properties. The residential properties along College Street appear to be older and may have been constructed in the late 19th century or early 20th century (Plate 8 and Plate 9). A review of the general neighbourhood determined that there are six properties with potential cultural heritage value, including 121 St. Catharines Street, 183 St. Catharines Street (Plate 10 to Plate 15). Of these, only 130 Brock Street and 183 St.

Catharine's Street are adjacent to the Study Area. The locations of potential heritage properties in relation to the Study Area are shown in Figure 7.

4.2.2 Landscape Context

The approximately 4.4-acre Study Area retains several education-related landscape elements. The front façade of the former school faces College Street where building envelope is constructed less than 2 m from the sidewalk/public right-of way. The space within the Study Area between the sidewalk and building envelop is comprised sections of asphalt interspersed with shrubs and small plantings (Plate 16). There is a small garden with shrubs and trees surrounding the front entrance to the school (Plate 17 and Plate 18). The south side of the school includes a concrete walkway, a narrow strip of lawn, and a tree line planted along a chain link fence (Plate 20). The north side of the property includes a large parking lot with isolated sections of lawn (Plate 21).

Most of education related landscape elements are located on the east side of the school at the rear of the Study Area. An asphalt covered yard is located immediately adjacent to the rear (east elevation) of the school building (Plate 22). The yard includes two basketball courts and playground markings (Plate 23 and Plate 24). Beyond the school yard is a large grass playing field that extends to the rear of the Study Area (Plate 25 and Plate 26). The grass playing field includes a soccer pitch, overgrown baseball diamond, and two play structures (Plate 27 to Plate 29). The back of the grass playing field is bounded by a chain link fence and cleared woodlot (Plate 30). The view from the back of the playing field towards the school shows how large the recreational grounds are relative to the school building (Plate 31).

4.2.3 College Street Public School (Building Exterior)

The College Street Public School in the Study Area is a two-storey building constructed in stages with the original core of the building built in 1885/1887 and additions added in 1921/1924, 1959, 1967, 1969, and 1972. The total floor area is 44,152.50 square feet (Appendix C). The original structure has a square footprint measuring approximately 43 by 43 feet ($13.1 \times 13.1 \text{ m}$) while the extensions off the original structure extend northwards approximately 201 feet (61.3 m) and southwards approximately 45 ft. All of the additions have irregular footprints and flat roofs and a variety of depths.

The front façade of the school front onto College Street and includes sections of the 1969, 1967, 1959, and 1921/1924 additions. A small section of the roofline of the original 1885/1887 school is visible from College Street (Plate 32 to Plate 35).

The northern portion of the front façade (west elevation) is comprised of the 1969 addition (Plate 36). This addition is one storey and constructed in simple, modernist style. The roof is flat with plain fascia and soffit. This section of the building is clad in red brick laid in stretcher bond. The recessed entrance is offset to the left (north). The windows in the 1969 addition have simple rectangular openings with no ornamental features. A 1969 date stone is located on the right side of the entrance.

The 1967 addition is located on the right (south) side of the 1969 addition (Plate 37). The addition has a modernist, stepped design with an irregular footprint. The 1967 addition has one bay and is divided from the adjacent 1969 and 1959 additions by vertical, red brick walls. The west elevation of the 1967 addition includes rows of classroom windows on the first and second floors. The windows have simple, rectangular

openings with no ornamental elements.

The 1959 addition is located on the right (south) side of the 1967 addition (Plate 37 and Plate 38). The 1959 addition is two storeys high with a flat roof. This section of the building is constructed in a modernist style with pronounced, projecting eaves with brackets. The 1959 addition is truncated by red brick exterior walls that are laid out in a stretcher bond, but the vast majority of the elevation is comprised of rows of classroom windows and stucco panels. There are two entrances to the 1959 section of the building. One entrance is offset to the right (north) and includes a double height, recessed entryway with double doors. The second entrance is offset to the left (south) and is accessed by a set of concrete stairs flanked by red brick planters. A 1959 date stone is located on the front of the left planter.

The southernmost end of the front façade (west elevation) is comprised of the 1921/1924 addition (Plate 38 and Plate 39). The 1921/1924 addition features a flat roof with concrete eaves and a moulded wooden architrave that blends with the original structure's fasia and soffit to the north. The fenestration of the 1921/1924 is clad in red common bond brick with brick panelling. The fenestration features two upper rectangular two-light windows with plain lug sills, and aluminum trim/ transom and two lower and basement blind windows covered in stucco. Unlike the additions from the 1950s and 1960s, the 1921/1924 addition is constructed in an Edwardian style.

A small section of the original 1885/1887 school is visible from College Street (Plate 40 and Plate 41). All of the original front façade of the school is obscured by the 1959 addition except for a small section of the roofline where an oval dormer with four lights is visible. The only other remaining original feature of the roofline are the wood brackets. The fascia and soffit have been covered with new, aluminum siding. Original window openings are visible under the roofline and are segmentally arched with header and stretcher voussoirs. The windows have been bricked over to form a blind. The visible section of the original school building is clad in red brick laid out in a stretcher bond.

The north elevation of the school is comprised of the 1969 and 1972 additions of the building (Plate 42). The 1969 section of the north elevation is two storeys in height and houses the gym. This elevation has one aluminum door that is offset to the left (east). The door is accessed via a concrete ramp with a wood railing (Plate 43 and Plate 44). There are four brick projections on the first storey of the 1969 addition that housed ventilation infrastructure. This section of the building has a flat roof, concrete foundations, and is clad in red brick laid out in a stretcher bond. The 1972 addition of the north elevation is a simple, one storey section of the building that is clad in red brick that is laid out in stretcher bond. There is one entrance to the 1972 addition that is offset to the right (west). The entrance is recessed and has a double, aluminum door that is access via a metal staircase (Plate 45). A 1972 date stone is located on the left side of the entrance (Plate 46). The 1972 section of the building has two windows that have simple, rectangular openings.

The east elevation of 132 College Street includes sections of the 1972, 1969, 1967, 1959, 1921/24, additions and the 1885/1887 original core of the school. The north half of the east elevation is comprised of the mid-20th century additions to the school (Plate 48). Here, the architectural style of the 1972, 1969, 1967, and 1959 additions mirrors the simple, modernist design shown of the front façade. The 1959 section is two storeys high while all other additions are one storey in height. All rooflines are flat and window openings are simple and rectangular with no ornamental finishes. There is one entrance to the 1959 addition that is offset to the left (south) and provides below grade access to the basement. The west elevation also includes an entrance to the 1967 addition that is offset to the right (north) (Plate 49, Plate 51, and Plate 52). There is one entrance to the 1967 addition on the east elevation that is accessed via a

metal staircase (Plate 50).

The south half of the east elevation includes the original 1885/1887 section of the building and the 1921/1924 addition (Plate 53). The 1885/1887 addition is a two storey, four bay, brick building with a square footprint (Plate 54). The original section of the building has a hipped roof that is clad in asphalt shingles. The roof has projecting eaves with wood brackets. The soffit is decorated with dentils and the fascia is plain. The original building has stone foundations and is clad in red brick laid out in a common bond (Plate 55). The base of the building includes a brick plinth. The window openings of the original building are segmentally arched with header/stretcher voussoirs and plain stone sills (Plate 56). The windows are all replaced/new. Overall, this original section is built in an institutional Italianate style. The red brick of the original school building also has etched graffiti with the names of past students (Plate 57).

The 1921/1924 addition comprises the southernmost section of the school. The east elevation of the 1921/1924 addition is two storeys high with a flat roof, red brick exterior, and concrete foundations (Plate 58). The rear elevation is arranged in three bays that are marked with recessed brick borders. The rear has four windows (two on the first storey and two on the second storey). The windows have rectangular window openings with no decorative surrounds and plain concrete sills (Plate 59). The east elevation of the 1921/1924 elevation includes a projecting entrance that is offset to the right (north) (Plate 60). The entrance has a ground level double door that is covered by flat awning that is suspended by a set of chains (Plate 61). A double window is located above the entrance.

The south elevation is mainly comprised of the 1921/1924 addition of the school. This section of the building is two storeys high with a flat roof, concrete foundations, and red brick exterior. The south elevation of the 1921/1924 addition has four sets of classroom windows (two on each floor). The window openings are rectangular with no decoration and plain, concrete sills. The south elevation also includes a small section of the 1959 addition on the front façade and the 1967, 1969, and 1972 additions at the rear of the building (Plate 62 and Plate 63).

4.2.4 College Street Public School (Building Interior)

The school at 132 College Street consists of two distinct above ground levels and one lower level. For the purposes of this analysis, the interior will be discussed in terms of these floors in relation to their associated years of construction. A marked-up floor plan with coloured hatched boundaries to represent the associated dates of construction as inferred from background research and information gathering is provided in Plate 76 to Plate 88. Detailed photographs of the building interior are provided in Appendix D. Copies of the floor and site plans are provided in Appendix C and the associated reference colours provided below:

- Original Construction (1885-1887) Pink¹
- Building Addition (1921/1924) Yellow
- Building Addition (1959) Light Blue
- Building Addition (1967) Green
- Building Addition (1969) Purple
- Building Addition (1972) Red

4.2.4.1 First Floor

The first floor of 132 College Street includes sections of the 1885/1887 original school and 1921/1924 1959, 1967, 1969, and 1972 additions. A floor plan showing the layout of the first floor is provided in Plate 76. The first floor contains the principal's office, secretary's office, nine classrooms, four bathrooms, three corridors, three connected kindergarten rooms, a work room, a staff room, a foyer, a custodian room, a servery, library, library office, vice-principal's office, a gymnasium with stage/mezzanine, change rooms, storage areas, and four sets of stairs. The first floor also contains movable artifacts related to the history of the school that have potential cultural heritage value, including: the intercom system in the secretary's office, chalkboards throughout the first floor, mail cubby in the staff room, wood lectern with school crest

¹ Footprint of original structure inferred from background research/field visit

in the stage/mezzanine, school crest above the stage in the gymnasium, the 'Great Things Are Happening at College St.' sign in the foyer, and the 'The Simpson Junior Sportsmanship Trophy' list of qualifies found in the foyer (Plate 64 to Plate 71). Original building elements related to the original 1885/1887 school that remain in place include: the moulded trim around the windows in Art Classroom 2 (131) and the railings in stairwell 132 (Plate 72 to Plate 74).

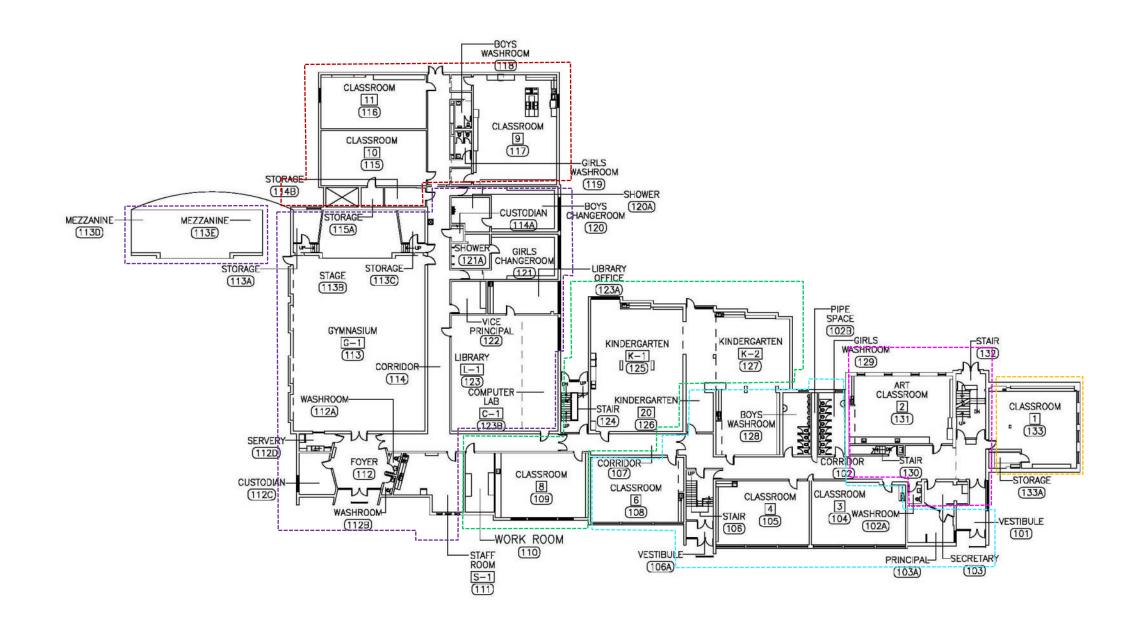

Plate 76: First Floor Plan of 132 College Street

Page 48 of 104

4.2.4.2 Second Floor

The second floor of 132 College Street includes sections of the 1885/1887 original school and 1921/1924 1959, and 1967 additions. A floor plan showing the layout of the first floor is provided in Plate 79. The second floor has eight classrooms, two corridors, and four sets of stairs. Items with potential movable cultural heritage value on the second floor include chalkboards (where extant). Original architectural finishes related to the 1885/1887 school include the moulded window surrounds in classroom 217 (Plate 77 and Plate 78).

Page 50 of 104

4.2.4.3 Third Floor

The third floor is accessed via a set of stairs on the second floor of the 1885/1887 section of the building. A floor plan of the third floor is provided in Plate 82. The third floor consists of a single room that was likely used for storage. Original remaining architectural finishes on the third floor include windows with segmentally arched openings and wood surrounds (Plate 80 and Plate 81).

Plate 80: Original window and wood surround on the third floor

Plate 81: Original window and moulded wood surround on the third floor

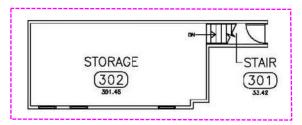

Plate 82: Third Floor Plan of 132 College Street

4.2.4.4 Basement

The school has two separate basements that are associated with different periods of construction. A floor plan of the basement is provided in Plate 88. The original basement is associated with the 1885/1887 and 1921/1924 sections of the building and includes two mechanical rooms, a water tank room, a custodian room, and three storage rooms.

The second basement is associated with the 1967 addition of the school. This section of the basement

includes a classroom, storage room, corridor, and stairwell.

Notable building elements related to the 1885/1887 and 1921/1924 sections of the building are present in the first basement. These include: stone foundations, a large red fire door stamped with '*Thos Irwin & Son Limited. Mfors. Hamtilton Ontario*', railings in stair 001, and bricks in the storage rooms that have been etched with student graffiti (Plate 83 to Plate 87).

Plate 83: Detail of stone foundations in the 1885/1887 section of the basement

4.2.5 Analysis of Physical Conditions and Heritage Integrity

4.2.5.1 Physical Condition

Table 3 provides a summary of the physical conditions of the Study Area using criteria adapted from a checklist developed by Historic England (Watt 2010: 365-361) and list in Fram's 2003 *Well-Preserved: The Ontario Heritage Foundation's Manual of Principles and Practice For Architectural Conservation.* Note that these observations are based on surficial inspection only and should not be considered as a structural engineering assessment.

Element	Observed Conditions
General Structure	 Original 1885-1887 structure obscured on three elevations by the 1921/1924, and 1959 building additions The overall building, inclusive of the original school and all additions, appears to be in good-to-fair condition. Water damage was observed in the second-floor classroom of the original 1885/1887 section of the building.
Roof	 Roofing appears to be in good condition for all building sections Aluminium caps on facia and soffits of original structure with original wooden modillions
Rainwater Disposal	All gutters appear to be in good condition
Exterior Elements (Walls/Foundations/Chimneys etc)	• Exterior walls in good condition though there is obvious distinction between the various additions
Windows and Doors	• Windows and doors appear to be in good condition. Windows and doors are generally new/replaced except for the fire door and storage room doors in the 1885/1887 and 1921/1924

Page 54 of 104

Element	Observed Conditions	
	basement observation consistent with DSBN report that claims that indicate the windows and doors were replaced between 2009 and 2010 (Appendix C)	
Internal Roof Structure/Ceiling	 Physical condition of internal roof structure unknown as it is covered by lightweight panels Water damage observed in the second-floor classroom of the 1885/1887 section of the building 	
Floors	 Floors appear to be in relatively good condition. All floors are new/replaced. Some evidence of water damage noted in second level 1885/1887 classroom. 	
Stairways/Galleries/Balconies	Stairways appear to be in good conditionMix of original word railings and later metal style railings	
Interior Decorations/Finishes	• Interior finishes appear to be in good condition. All interior decoration/finishes appear to be new/replaced. Few to no interior finishes relating to the 1885/1887 or 1921/1924 building sections remain.	
Fixtures & Fittings	• Fixtures and fittings appear to be in working condition. All are new/replaced.	
Building Services	Services appear to be active	
Site & Environment	 Property appears to be well maintained and in overall good condition 	
General Environment	Overall good condition	

4.2.5.2 Heritage Integrity

In the 2006 *Heritage Property Evaluation: A Guide to Listing, Researching, and Evaluating Cultural Heritage Property in Ontario Communities,* the MHSTCI stresses that a property need not be in its original condition to have CHVI though stresses the concept of integrity:

"Integrity is a question of whether the surviving physical features (heritage attributes) continue to represent or support the cultural heritage value or interest of the property."

(MHSTCI 2006b: 26)

The MHSTCI further expands on this concept in their 2014 *Standards and Guidelines for Conservation of Provincial Heritage Properties, Heritage identification & Evaluation Process* which builds on its description of integrity to encompass landscape features and references the *Ontario Heritage Tool Kit* and the 2008 *US National Park Service Info Bulletin: VIII. How to Evaluate the Integrity of a Property* as potential guidance documents (MHSTCI 2014; USDI 2008). The latter source identifies integrity as *"the ability of a property to convey its significance"* (2018: 1-2) and defines this within the seven aspects of integrity: 1) Location, 2) Design, 3) Setting, 4) Materials, 5) Workmanship, 6) Feeling, and 7) Association. Based on this definition integrity can only be judged once the significance of a place is known (USDI 2008: 1-2). Other guidance documents reviewed as part of this assessment define integrity as the *"wholeness"* or *"honesty"* of a site and examines the subsequent effects of time and change on the sites cultural heritage value (Drury and

OCUL2202| June 2022

Page 55 of 104

McPherson 2008: 45).

With the above in mind and using Kalman's 1979 *Evaluation of Historic Buildings* criteria for "Integrity" ("Site", "Alterations", and "Condition") the Study Area's level of heritage integrity is analysed in Table 4. This analysis was also considered when evaluating the Study Area for CHVI. The associated survival percentage and rating is based on the following scale:

- Poor = 0-20%
- Fair = 21-40%
- Good = 41-60%
- Very Good = 61-80%
- Excellent = 81-100%

Table 4: Analysis of Heritage Integrity

Element	Original Material/Type	Alteration	Survival (%)	Rating	
Setting	Property located within the suburban community of Smithville, bounded by Morgan Street on the north, residential properties on the east and south, and College Street on the west	Multiple additions on the original structure extending north and south along College Street and Morgan Avenue	70	Very Good	Generally spea the community significantly ex
Site Location	Set back from Morgan Street by approximately 15m	Multiple additions on the original structure extending north and south along College Street and Morgan Avenue	50	Good	While the locat primary access front façade is
Footprint	Original structure has a square footprint	Multiple additions on the original structure (1921/1924, 1959, 1967, 1969, and 1972)	5	Poor	Only the east e predominantly
Wall	Original structure clad in red brick laid out in stretcher bond patterns	The 20th century additions employ the use of red brick/red brick veneer on the exterior of building intermixed with stucco and precast concrete block foundations	20	Fair	The use of bric visual distinctio from the ROW
Foundation	Original structure employed the use of stone foundations which are still visible in the basement	Subsequent 20th century additions employed the use of precast concrete blocks	5	Poor	Original found blocks
Exterior Doors	Unknown	All doors replaced between 2009/2010 as indicated by the District School Board of Niagara (DSBN 2014) in Appendix C	0	Poor	No additional o
Windows	Unknown	 Some windows retain original interior trim Multiple 20th century windows made of metal/synthetic material and several original windows bricked over to create blind windows Windows replaced between 2009/2010 as indicated by DSBN (2014) in Appendix C 	5	Poor	No additional o
Roof	Truncated	 Original roof structure is retained though as indicated by the DSBN (2014) in Appendix C at least portions of the roof material were replaced in 2012 Later additions implemented the use of a flat roof 	5	Poor	No additional o
Chimneys	n/a	n/a	n/a	n/a	No additional
Water Systems	Unknown	Appear to have been replaced in 20th century	0	Poor	No additional
Exterior Decoration	Original structural elements including multi- panel segmental windows with segmentally arched brick voussoirs and stone lintels, the third-floor semi-circular dormer with round four light window decorative wooden brackets	 Minimal elements of original western façade retained as a result of the 1959 addition Northern and southern facades of the original structure are non-existent 	20	Poor	Elements of ex obscured by 20
Exterior Additions	Original structure building in 1885-1887	Several additions in the 20th century: 1) 1921/1924 2) 1959 3) 1967 4) 1969	5	Poor	Core of origina All other buildi to the addition

4.2.5.2.1 Results

Based on the analysis of physical conditions and heritage integrity presented in Table 3 and Table 4, it was found that the Study Area is in fair-to-good physical condition but has a poor level of heritage integrity. The poor level of heritage integrity is a direct result of the 1921/1924, 1959, 1967, 1969, and 1972 building additions that have largely obscured and physically altered the original 1885/1887 school building. Only the rear (east elevation) of the original structure is relatively intact.

5.0 Evaluation of Cultural Heritage Value or Interest

5.1 Ontario Regulation 9/06

The criteria for determining CHVI of a property at a local level are set out in O. Reg. 9/06 of the *Ontario Heritage Act*. A property may be worthy of designation under the *Ontario Heritage Act* if it meets one or more of criteria of O. Reg. 9/06.

5.2 Evaluation of the Study Area

The College Street Public School was evaluated using the criteria for CHVI prescribed in O. Reg. 9/06. Table 5 provides a summary of the evaluation, and a detailed evaluation is provided below.

Table 5: Evaluation of Cultural Heritage Value or Interest of 132 College Street			
The property has design value or physical value because it:	Is a rare, unique, representative or early example of a style, type, expression, material or construction method	×	
	Displays a high degree of craftsmanship or artistic merit	×	
	Demonstrates a high degree of technical or scientific achievement.	×	
The property has historical value or associative value because it:	Has direct associations with a theme, event, belief, person, activity, organization or institution that is significant to a community.	~	
	Yields or has the potential to yield, information that contributes to an understanding of a community or culture	×	
	Demonstrates or reflects the work or ideas of an architect, artist, builder, designer or theorist who is significant to a community	×	
The property has contextual value because it:	Is important in defining, maintaining or supporting the character of an area	×	
	Is physically, functionally, visually or historically linked to its surroundings	×	
	ls a landmark	×	

5.2.1 Design Value or Physical Value

The building in the Study Area is a two-storey school with an irregular shaped plan. The footprint of the original 1885-1887 schoolhouse is distinguishable on the rear facade (east elevation) but it is largely obscured or replaced as a result of the multiple 20th century additions from 1921/1924, 1959, 1967, 1969 and 1972. While some original design elements survive, these finishes are not unique or unusually well made for the period of construction and are limited to the details of the rear façade (east elevation) and minor/remnant interior finishes from the 1885-1887 original construction such as original window trim

and mouldings. Therefore, based on the above it was determined that the integrity of the surviving physical features have been compromised to the point where the structure no longer represents a rare or unique representative of the original late 19th century school and does not demonstrate a high degree of craftsmanship or artistic merit.

Additionally, due to the 20th century additions, the structure as a whole is no longer distinguishable as a representative example of a late 19th century schoolhouse. Nor is its design rare or unique and no building elements were noted that demonstrate a high degree of technical or scientific achievement.

Based on the above discussion, it is concluded that the 132 College Street does not meet criterion 1 (i-iii) of O. Reg. 9/06 and does not have design value or physical value.

5.2.2 Historical Value or Associative Value

The Study Area, also known as College Street Public School, is located within the community of Smithville in the Township of West Lincoln. The structure which was originally built between 1885 and 1887 as Smithville's first high school. As the first of its kind in the area, students from other counites paid fees to attend the high school and were billeted in the Township during the school week.

During the 20th century College Street Public School was altered by large additions built in 1921/1924, 1959, 1967, 1969 and 1972 completed to accommodate Smithville's growing population. By 1954, a new high school was constructed in Smithville and the Study Area became a primary school.

While the school has since closed, the property has direct association as an institution (elementary and high school) the reflects the themes of and development of rural education in Ontario from the late 19th century to late 20th century. This is reflected by the retention of moveable school artifacts, equipment, and furniture that demonstrate the use of this property as a school. Specifically, the school crest in the gymnasium, lectern with school crest on the stage, plaques, signs, and brick with etched student graffiti reflect the long-standing use of this property as a school. In addition, isolated building elements remain that date to the 1885/1887 or 1921/1924 periods of construction that are examples of historical school interior finishes. These included the moulded window trim in the 1885/1887 classrooms, windows on the third floor, oval window in the attic, and railings in stair 001/132/201.

Based on the above discussion, it is concluded that 132 College Street meets criterion 2.i of O. Reg. 9/06 and has historical/associative value.

5.2.3 Contextual Value

The neighbourhood character surrounding the school is a mix of residential and commercial properties that date to the mid-to-late 20th century. There are isolated properties with potential heritage value in the vicinity of the school, but these do not form a cohesive historical neighbourhood. The original 19th century core of the school is not visible from College Street except for a small section of the roof line that is visible behind the 1959 addition on the west elevation. Given the mixed character of the surrounding neighbourhood and the highly altered physical condition of the school, it was found that 132 College Street does not define, maintain, or support the character of the area.

The school is not physically, functionally, visually, or historically linked to its surroundings. While 132 College Street was used as a school since the late 19th century to the 21st century, the historical character of the school is largely obscured by the later additions added to the west, north, and south elevations of the building. There are no known material connections to the broader context that signify a significant

physical connection and the property no longer functions as a school since it is no longer in operation as a public school. There are no known visual connections between the school and surrounding context that were noted through background research, community consultation, or during the field review. Finally, the historical character of the school is best captured through historical/associative value and the specific items of school memorabilia contained in the school rather than the historical context of the property and school building itself.

The property is not known to act as a landmark given its location on a side street, relatively low building profile, and the multiple 20th century additions that obscure the 1885/1887 original core of the school from College Street and Morgan Avenue.

Based on the above discussion, it is concluded that the 132 College Street does not meet criterion 3. (i-iii), of O. Reg. 9/06 and does not have contextual value.

5.2.4 Summary

Based on a review of background documents, community engagement and property inspection it was determined that the Study Area meets one criterion (historical/associative value) for CHVI at a local level.

5.3 Statement of Cultural Heritage Value or Interest

5.3.1 Description of the Property

The former College Street Public School at 132 College Street in the community of Smithville in the Township of West Lincoln was originally constructed between 1885-1887 then altered through multiple 20th century additions. Associated with the school building are a grounds covering 1.81 hectares that includes recreational yards and sports fields.

5.3.2 Statement of Cultural Heritage Value or Interest

The historical or associative value of the College Street Public School property lies its direct association with an important educational institution in the community, specifically as Smithville's first high school. It's value is also for its direct association with the theme of development of rural education from the late 19th century to late 20th century. As a principal school in the Township it drew students from a large rural area including Welland and Haldimand, and over its long history required continual expansion and modification to address the growing population.

5.3.3 Heritage Attributes

Heritage attributes that contribute to the *historical/associative value* of the property:

- Building components that date to the 1885/1887 or 1921/1924 sections of the school:
 - Interior Moulded wood window trim in the 1885/1887 first and second floor classrooms
 - \circ \quad Wood frame windows with moulded surrounds on the third floor
 - Oval window with four lights located on the front façade (west elevation) of the 1885/1887 roof
 - o Railings with wood handrails and metal box newel posts/balustrades in stair 001/132/201
 - Red fire door with manufacturers stamp in the 1885/1887 section of the basement
 - Bricks with etched student graffiti in the storage rooms of the 1921/1924 section of the basement
- Moveable material culture that speaks to the school's history including:
 - School crest in gymnasium
 - Wood lectern with school crest in the gymnasium
 - Wood mail cubby in the staff room
 - Slate chalkboards throughout the school
 - Commemorative plaques on the first floor
 - Framed qualities in reference to the schools 'Simpson Junior Sportsmanship Trophy'
 - School banners
 - o 'Great Things Are Happening At College St.' sign in the foyer
 - Intercom system

6.0 Impact Assessment

The Client intends to develop the entire Study Area for 138 mixed-use units. The design plans for this development are provided in Appendix E and though conceptual are sufficient to identify the potential impacts. This assessment considers two categories of impacts:

- **Direct Impact:** A permanent or irreversible negative affect on the CHVI of a property that results in the loss of a heritage attribute. Direct impacts include destruction or alteration.
- **Indirect Impact:** An impact that is the result of an activity on or near a cultural heritage resource that may adversely affect the CHVI and/or heritage attributes of a property. Indirect impacts include shadows, isolation, direct or indirect obstruction of significant views or vistas, a change in land use, or land disturbances.

It should be noted that land disturbances, as defined in MHSTCI *InfoSheet #5*, apply to archaeological resources. An archaeological assessment is beyond the scope of this study since recommendations regarding archaeological resources must be made by a professional archaeologist licensed by the MHSCTI. An archaeological assessment for this project has been undertaken under separate cover.

6.1 Description of the Proposed Work

It is Wood's understanding that the proposed development will consist of 12 townhouses fronting on Morgan Avenue, 6 live/work units fronting on College Street, and 120 stacked townhouses in the interior of the lot as depicted in the conceptual drawings provided in Appendix E.

6.2 Assessment of Potential Impacts

An impact assessment to evaluate the potential impacts of the property is contained in Table 6. The impact assessment is based on the conceptual drawings contained in Appendix E.

Table 6: Assessment of Impacts

Impact Example	Impact Assessment
Direct Impacts	
Destruction of any, or part of any, significant heritage attributes or features.	The proposed development will result in the destruction of the entire building and alteration of all landscape components within the Study Area that without mitigation will have a negative effect on the CHVI of the property.
	Implementation of the mitigation measures recommended in this report, including but not limited to salvage of heritage attributes and commemoration will reduce negative impacts to the CHVI of the property. This salvage provides the most feasible option to conserve the CHVI of the property despite the demolition of non-contributing built and landscape elements within the property.
Alteration that is not sympathetic, or is incompatible, with the historic fabric and appearance.	The direct impacts to 132 College Street are related to the destruction of the school building and landscape elements to clear the site for new development. Accordingly, no direct impacts related to alteration are noted.
Indirect Impacts	
Shadows created that alter the appearance of a heritage attribute or change the viability of a natural feature or plantings, such as a garden.	No natural heritage features such as a garden or plantings were noted as heritage attributes of the property. Accordingly, no shadow related impacts are anticipated.
Isolation of a heritage attribute from its surrounding environment context or a significant relationship.	The CHVI and heritage attributes of this property are not related to their connection with the surrounding environment. Therefore, no negative impact is anticipated.
Direct or indirect obstruction of significant views or vistas within, from, or of built and natural features.	No significant views or vistas have been identified as a heritage attributes contributing to the CHVI of the property. As such, no indirect impact is anticipated.
A change in land use such as rezoning a battlefield from open space to residential use, allowing new development or site	Although the Study Area is already zoned for High Density Residential, the change from institutional to residential would have an indirect negative impact on the CHVI as identified. This is addressed by Recommendation 2.

Impact Example	Impact Assessment
alteration to fill in the formerly open	
spaces.	
Land disturbances such as a change in	The proposed mix-used land development will result in land disturbance within the property.
grade that alters soils, and drainage	However, no risks to the CHVI of the property related to drainage are noted. In addition, the
patterns that adversely affect an	consideration of archaeological resources is beyond the scope of the CHIA.
archaeological resource.	

OCU2202| June 2022

Page 66 of 104

6.3 Summary of Potential Impacts

The proposed mixed-use land development will result in destruction and widespread alteration of the Study Area and change the land use from educational/institutional to a mixed residential/commercial. The development plan includes the demolition of the school and removal of landscape features. Table 6 outlined the potential impacts to 132 College Street posed by the proposed developments and identifies that the impacts will be mitigated by the recommendations contained in Section 8.0 of this report.

7.0 Consideration of Alternatives and Mitigation Measures

The impact assessment identified the potential for direct adverse impacts to the CHVI and heritage attributes of the Study Area. Accordingly, considered alternatives and mitigation measures have been developed using MTSCHI InfoSheet#5 of the Ontario Heritage Tool Kit and Section 8 of the Township of West Lincoln Official Plan. These include:

- 1) "Do Nothing" or preserve and maintain the heritage property by avoiding impacts to the heritage attributes.
- 2) Rehabilitate and restore the schoolhouse for adaptive reuse within the new development in its current location.
- Relocate the school to a new location within the proposed development and rehabilitate it for adaptive reuse including the restoration of restore architectural features consistent with the original structure's late 19th century Italianate and second empire architectural influences.
- 4) Salvage and document notable heritage artifacts that contribute to the CHVI of the property for donation during and Consult with the Township of West Lincoln during detailed design, regarding the potential inclusion and development of commemorative plaques or place naming strategies within the new development.

7.1 Option 1: Do Nothing

"Do Nothing" or preserve and maintain the heritage property by avoiding impacts to the heritage attributes.

Advantages: The approach adheres to the conservation principle of minimal intervention. This approach allows for the property to retain its heritage attributes in situ and preserves the integrity and authenticity of the resource.

Disadvantages: The school is currently unused and without intervention its structures could fall into disrepair and its heritage attributes could rapidly deteriorate. While the school is in good condition, its heritage integrity has been compromised by extensive additions and significant repairs/restoration would be required to preserve and maintain its CHVI. This option also does not serve to meet the provincial and municipal targets for new residential/commercial mixed land use development which will allow more people to live in downtown Smithville (McDonald 2020).

This option is not feasible because:

• Extensive capital investment would be required to preserve, maintain, and repair the school.

7.2 Option 2: Rehabilitation

Rehabilitate and restore the schoolhouse for adaptive reuse within the new development in its current location.

Advantages: This approach would conserve the identified heritage attributes in their current location within the property.

Disadvantages: Conserving the heritage attributes in their current location would constrain the surrounding development. Furthermore, the heritage integrity of the original structure has been severally compromised by various 20th century additions including the removal of three original facades to the point where the changes required to rehabilitate the school in situ to its original 19th century structure would be extremely costly and would depend on an incomplete record of original materials that would reduce its historical authenticity and constitute an adverse effect on its CHVI.

This option is not feasible because:

- The extensive change required to rehabilitate the school would substantially reduce its heritage integrity and authenticity.
- The spatial configuration of the heritage attributes is not key to the CHVI of the property. Therefore, the detrimental effects to the proposed development posed by this option are disproportionate to any benefits gained through full rehabilitation.
- It assumes that the core of the original structure has sufficient 19th century fabric to be rehabilitated; the field review indicates that the later additions have created large breaches and removed large sections of original masonry.

7.3 **Option 3: Relocation**

Relocate the school to a new location within the proposed development and rehabilitate it for adaptive reuse.

Advantages: This option would conserve the physical connection of the school to its original land parcel, while adaptive reuse and reconfiguration of the building in the new development would increase appreciation of its attributes for a wider public, thereby enhancing appreciation and understanding of the Township's heritage.

Disadvantages: Relocating the school is in opposition to MHSTCI *Guiding Principle* for "original location". This principle states that buildings should not be moved "unless there is no other means to save them since any change in site diminishes heritage value considerably". This option could result in total loss of CHVI if an accident occurs during the process or planning is insufficient.

Furthermore, the integrity of the original structure has been severally compromised by various 20th century additions including the removal of three original facades to the point where the changes required to rehabilitate and relocate would be extremely costly and it would require a dependency on an incomplete record of original materials that would ultimately reduce its historical authenticity and constitute an adverse effect on its CHVI.

This option is <u>not feasible</u> because it:

- The extensive change required to relocate the school would substantially reduce its heritage integrity and authenticity.
- It assumes that the core of the original structure has sufficient 19th century fabric to be rehabilitated; the field review indicates that the later additions have created large breaches and removed large sections of original masonry.

Page 68 of 104

7.4 Option 4: Salvage & Commemoration

Salvage and document notable heritage artifacts that contribute to the CHVI of the property for donation during and consult with the Township of West Lincoln regarding the potential inclusion and development of commemorative plaques or place naming strategies within the new development.

Advantages: This option would conserve the historical connection of the school to its community original land parcel while salvage of notable artifacts would retain some physical link to the school's intangible historical or associative value. This option is both cost effective and acknowledges the school's historical importance within the community.

Disadvantages: Destruction of the school would remove all CHVI and heritage attributes from the Study Area. Even if some materials are salvaged, there is potential that their connection with the school and its historical or associative value will eventually be lost.

Despite the disadvantages, this option is the most <u>feasible</u> because it:

- Maintains linkages with the Study Area's intangible heritage values
- Establishes a connection with the site into the evolving contemporary community in a way that will encourage understanding and appreciation of the community's early educational heritage

8.0 Recommendations

This CHIA has concluded that 132 College Street has historical/associative value per the criteria contained in O. reg. 9/06 of the *Ontario Heritage Act*. Furthermore, this CHIA also concluded that the heritage integrity of the original 1885/1887 school has been severely compromised and that the CHVI of the property can be best mitigated through a commemoration and salvage conservation approach (Option 4).

This option helps to conserve the historical association of the school to its community/original land parcel and allows for the enhanced appreciation of the intangible heritage linked to the materials while also promoting a pedestrian oriented community.

To conserve the CHVI and heritage attributes of the Study Area, Wood makes the following recommendations:

- 1. Consult with the Township of West Lincoln, regarding the following:
 - a. Documentation and/or salvaging of the following materials for donation or as a commemorative features within the new development or for display in a local museum/archive:
 - i. Building components that date to the 1885/1887 or 1921/1924 sections of the school:
 - Interior Moulded wood window trim in the 1885/1887 first and second floor classrooms
 - Wood frame windows with moulded surrounds on the third floor
 - Oval window with four lights located on the front façade (west elevation) of the 1885/1887 roof
 - Railings with wood handrails and metal box newel posts/balustrades in stair 001/132/201
 - Red fire door with manufacturers stamp in the 1885/1887 section of the basement
 - Bricks with etched student graffiti in the storage rooms of the 1921/1924 section of the basement
 - ii. Moveable material culture that speaks to the school's history including:
 - School crest in gymnasium
 - Wood lectern with school crest in the gymnasium
 - Wood mail cubby in the staff room
 - Slate chalkboards throughout the school
 - Commemorative plaques on the first floor
 - Framed qualities in reference to the schools 'Simpson Junior Sportsmanship Trophy'
 - School banners
 - 'Great Things Are Happening At College St.' sign in the foyer
 - Intercom system
 - b. Potential inclusion and development of commemorative plaques or place naming strategies.

9.0 Assessor Qualifications

This report was prepared and reviewed by the undersigned, employees of Wood. Wood is one of North America's leading engineering firms, with more than 50 years of experience in the earth and environmental consulting industry. The qualifications of the assessors involved in the preparation of this report are provided in Appendix F.

Closure

10.0 Closure

This report was prepared for the exclusive use of the 2853972 Ontario Ltd c/o Phelps Homes Ltd. and is intended to provide a Cultural Heritage Impact Assessment of the Study Area. The Study Area at 132 College Street consists of a former Public School with an irregular floor plan located at the corner of College Street and Morgan Avenue.

Any use which a third party makes of this report, or any reliance on or decisions to be made based on it, are the responsibility of the third party. Should additional parties require reliance on this report, written authorization from Wood will be required. With respect to third parties, Wood has no liability or responsibility for losses of any kind whatsoever, including direct or consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.

The report is based on data and information collected during the cultural heritage assessment conducted by Wood. It is based solely a review of historical information, a property reconnaissance conducted on April 14, 2022, and data obtained by Wood as described in this report. Except as otherwise maybe specified, Wood disclaims any obligation to update this report for events taking place, or with respect to information that becomes available to Wood after the time during which Wood conducted the cultural heritage assessment. In evaluating the Study Area, Wood has relied in good faith on information provided by other individuals noted in this report. Wood has assumed that the information provided is factual and accurate. In addition, the findings in this report are based, to a large degree, upon information provided by the current owner/occupant. Wood accepts no responsibility for any deficiency, misstatement or inaccuracy contained in this report as a result of omissions, misinterpretations or fraudulent acts of persons interviewed or contacted.

Wood makes no other representations whatsoever, including those concerning the legal significance of its findings, or as to other legal matters touched on in this report, including, but not limited to, ownership of any property, or the application of any law to the facts set forth herein. With respect to regulatory compliance issues, regulatory statutes are subject to interpretation and change. Such interpretations and regulatory changes should be reviewed with legal counsel.

This report is also subject to the further Standard Limitations contained in Appendix G. We trust that the information presented in this report meets your current requirements.

Should you have any questions, or concerns, please do not hesitate to contact the undersigned.

Respectfully Submitted,

Wood Environment & Infrastructure, a Division of Wood Canada Limited

1. COLLEGE STREET PUBLIC SCHOOL OVERVIEW

College Street Public School is owned by the District School Board of Niagara and was used as an elementary school.

The facility, constructed in 1921 with additions in 1959 and 1967, is a brick building with four levels and has a gymnasium and stage, a library, 21 classrooms, a staff room and office space.

The site is relatively flat and contains a large open area at the rear of the property. There are 34 parking spaces in the asphalt parking lot. There is a townhouse complex to the south and residential properties to the north and east.

The total floor area is 44,152.50 square feet and with a site size of approximately 4.4 acres.

2. STATISTICAL DATA

Official Address:	132 College Street, Smithville, ON LOR 2A0
Current Registered Owner:	District School Board of Niagara
Legal Description:	PIN 46050-0263 LT School and Playground - Lts 29 & 30 Pl M90 as confirmed by Pl 30BA1687; Lt 31 Pl M90 as confirmed by Pl 30BA1687; t/ w easement over Pt Lt 42 Pl M90, Pts 1 & 2 on Pl 30R12123 as in NR154973; Township of West Lincoln
Zoning:	Residential Medium Density, Environmental Conservation
Official Plan Designation:	Institutional and Natural Heritage Systems
Site Dimensions:	The subject property is a 'L' shaped lot and consists of approximately 4.4 acres of land with a frontage on the east side of College Street of 340 feet. It has a north boundary of 327 feet facing Morgan Avenue. The property has an easterly boundary of 205 feet and a southern boundary of 729 feet. The boundary dimensions are approximate.
Site Area:	4.4 acres (approx.)
Building Area:	44,152.50 square feet
Date of Construction:	1921 Additions: 1959, 1967
<u>Utilities:</u>	Sanitary Sewer, Municipal Water, Hydro, Natural Gas
Security System: Parking	Presently monitored by PasWord Security
Spaces:	34

3. OPERATIONAL COSTS

	2016-2017	2015-2016

Building Section(s)	Room Name(s)	Room Number(s)	Description	Representative Photograph(s)	
First Floor				— • • • •	
Pirst Floor 1885/1887, 1959, 1967, and 1969	Corridors	Corridors 102, 107, and 114	The first floor is laid out in an L-Shaped plan connected by three long corridors (Corridors 102, 107, and 114). The corridor includes sections of the 1885-1887 (original construction), and the 1959, 1967 and 1969 additions. The section of the corridor from the original construction features grey speckled laminate tile flooring with black vinyl trim and walls covered in drywall. Moving northwards down the corridor a visible transition occurs, marked by the notable disuse of black vinyl trim, in which the flooring transitions to a mix of brown/black speckled laminate tile flooring on light grey base bordered by a speckled pink laminate. This pink pattered tiling transitions seamlessly into the baseboard and the walls consist of a mix of painted brick and concrete blocks. This floor/wall pattern is utilized in both the 1959 and 1967 corridors. The transition to the 1969 addition is identified when approaching the double door entrance to the foyer when the wall transitions to a two tone, lower blue and upper white, painted concrete block. All corridors are lit by recessed fluorescent lighting.	<image/> <caption></caption>	Corr
1885/1887	Art Classroom 2	131	Art Classroom 2 features a rectangular floor plan and is accessible by a single wooded doorway with a single-light molded transom. The tiling in this room is consistent with the laminate flooring associated with the 1885-1887 corridor. Four long six-light rectangular windows are depicted within the classroom all featuring painted moulded wood trim with interior metal storm window inserts and suspended fluorescent lighting. The 1921/1924 classroom, identified as Classroom 1 (Number 133) in the floor plan, includes similar window trim and floor finishings.	Corridor 114 Figure 14 Art Classroom 2 (Front)	Art

1967	Kindergarten K- 1, Kindergarten K-2, and Kindergarten 20	125, 126, and 127	The Kindergarten Classroom is a large L-shaped room that includes two classrooms and an office. This room has grey speckled vinyl flooring, a large L- shaped chalkboard with moulded wood trim, wooden cubbies, several sets of wooden cabinets, and two large murals. The kindergarten classroom features three rectangular and one square concrete support pilasters and the walls in this space consist of a mix of painted concrete blocks and painted veneer brick. The office space is simple and accessible via the hallway corridor directly across from the glass paneled doorway to the rear asphalt play area.

Second Floor					
1885/1887, 1959, 1967	Corridors	n/a	The second floor has an irregular plan that is connected by a multi-level corridor. The corridor connects the original 1885/1887 school to the 1921/1924, 1959, and 1967 additions. Similar to the first floor, the corridor finishes include grey speckled laminate tile flooring, black vinyl trim, and walls covered in drywall. Moving northwards down the corridor a visible transition occurs, marked by the transition of tan speckled laminate tile flooring bordered by a speckled pink laminate. The walls in this 1959 section feature two-tone, lower beige and upper white, precast concrete blocks. The flooring in the 1967 addition is consistent with the 1959 addition however the two-town walls consist of a lower blue pattern, matching the first level. The end of the corridor features seven decorative glass blocks framed in concrete and similar to the first floor is lit by recessed fluorescent lighting.		
					Co co
1885/1887	Classroom	217	The second-floor classroom from the 1885/1887 building section includes the same design and finishes as the first floor 1885/1887 classroom. Interior finishes include laminate floors, a drop ceiling, fluorescent lights, moulded window frames, chalk boards, and wood cabinets. The moulded window frames appear to be original.

Appendix F: Assessor Qualifications

ASSESSOR QUALIFICATIONS

Heidy Schopf, MES, CAHP – Built Heritage and Cultural Landscape Team Lead

Ms. Schopf is a Senior Cultural Heritage Specialist at Wood and has worked in the field of Cultural Resource Management since 2007. She is a Professional Member of CAHP. She has worked on a wide variety of projects throughout Ontario, including cultural heritage resources assessments, heritage impact assessments, heritage documentation reports (photographic and 3D/LiDAR), cultural heritage evaluations, strategic conservation plans, HCD studies and plans, heritage feasibility studies, and archaeological assessments. Ms. Schopf has extensive experience applying local, Provincial, and Federal heritage guidelines and regulations to evaluate protected and potential cultural heritage properties. She is skilled at carrying out impact assessments and developing mitigation measures to conserve the heritage attributes of properties where changes are proposed. Ms. Schopf has completed hundreds of cultural heritage projects under a variety of processes, including: Environmental Assessment Act, Planning Act, Ontario Heritage Act, Transit Project Assessment Process, Renewable Energy Approval, and Ontario Energy Board.

Henry Cary, Ph.D., CAHP, RPA – Senior Cultural Heritage Specialist and Staff Archaeologist:

Dr. Henry Cary has over 20 years of public and private-sector experience directing archaeological and cultural heritage projects in urban, rural, Arctic and Sub-Arctic environments in Canada as well as the Republic of South Africa, Italy, and France. His career has included positions as project archaeologist and cultural resource management specialist for Parks Canada's Fort Henry National Historic Site Conservation Program and Western Arctic Field Unit, Heritage Manager for the Town of Lunenburg UNESCO World Heritage Site, and senior-level archaeologist and cultural heritage specialist for CH2M and Golder Associates. He currently holds a Professional Archaeology Licence (P327) issued by the Ontario MHSTCI, is MTO RAQs certified in Archaeology/Heritage and is a member of the Canadian Association of Heritage Professionals (CAHP) and Register of Professional Archaeologists (RPA). His education includes a B.A. in Prehistoric Archaeology and Anthropology from Wilfrid Laurier University, a MA in Historical Archaeology from Memorial University, and a Ph.D. in War Studies from the Royal Military College of Canada. Currently, Henry also holds academic positions as Adjunct Professor of Anthropology at Saint Mary's University and lecturer in Visual & Material Culture at Mount Allison University.

Chelsea Dickinson, B.A. Hons, Cultural Heritage Specialist

Ms. Dickinson holds an Honours B.A. Degree in Near Eastern and Classical Archaeology from Wilfrid Laurier University, and a Post-Graduate Certificate in Geographical Information Systems from Fanshawe College and is currently completing a Master of Planning from the University of Waterloo. She has been working in the field of archaeological consulting since 2015 and holds an Applied Research license (License R1194) in Archaeology from the Ontario Ministry of Heritage, Sport, Tourism and Culture Industries. Ms. Dickinson has conducted all aspects of Stage 1 to 4 archaeological assessments (AAs) throughout Ontario, including environmental assessments (EA) conducted for the development of wind and solar farms, hydro line corridors and municipal roadway improvements. Ms. Dickinson has been the co-author on a multitude of AAs and cultural heritage reports and has experience working on cultural heritage assessment reports, heritage impact assessments, and documentation reports specializing in historical background research spanning across Southern Ontario. Ms. Dickinson has had the privilege of working alongside a multitude of First Nation community members while conducting archaeological and cultural heritage assessments in both Northern and Southern Ontario. Ms. Dickinson has experience using high precision GPS technologies, specifically Top Con Hi SR and FC5000 positioning systems, used to map in architectural features, diagnostic artifacts, as well as topographical anomalies and site boundaries and has experience using ArcGIS while conducting archaeological assessments.

Appendix G: Limitations

Limitations

- 1. The work performed in the preparation of the Cultural Heritage Impact Assessment (CHIA) and the conclusions presented are subject to the following:
- (a) The Standard Terms and Conditions which form a part of our Professional Services Contract;
- (b) The Scope of Services;
- (c) Time and Budgetary limitations as described in our Contract; and,
- (d) The Limitations stated herein.
- 2. No other warranties or representations, either expressed or implied, are made as to the professional services provided under the terms of our Contract, or the conclusions presented.
- 3. The conclusions presented in the report are based, in part, on visual observations of the Study Area. Our conclusions cannot and are not extended to include those portions of the Study Area which were not reasonably available, in Wood Environment & Infrastructure's opinion, for direct observation.
- 4. The potential and protected cultural heritage resources encountered at the Study Area were assessed, within the limitations set out above, having due regard for applicable heritage regulations as of the date of the inspection.
- 5. Services including a background study and fieldwork were performed. Wood Environment & Infrastructure's work, including archival studies and fieldwork, were completed in a professional manner and in accordance with the Ministry of Heritage, Sport, Tourism and Culture Industries' guidelines. It is possible that built heritage resources and cultural heritage landscape elements not visible from the public realm may be within, or adjacent to the Study Area.
- 6. The utilization of Wood Environment & Infrastructure's services during the implementation of any further cultural heritage work recommended will allow Wood Environment & Infrastructure to observe compliance with the conclusions and recommendations contained the CHRA. Wood Environment & Infrastructure's involvement will also allow for changes to be made as necessary to suit field conditions as they are encountered.
- 7. This report is for the sole use of the parties to whom it is addressed unless expressly stated otherwise in the report or contract. Any use which any third party makes of the report, in whole or in part, or any reliance thereon, or decisions made based on any information of conclusions in the report, is the sole responsibility of such third party. Wood Environment & Infrastructure accepts no responsibility whatsoever for damages or loss of any nature or kind suffered by any such third party as a result of actions taken or not taken or decisions made in reliance on the report or anything set out therein.
- 8. This report is not to be given over to any third-party other than a governmental entity, for any purpose whatsoever without the written permission of Wood Environment & Infrastructure, which shall not be unreasonably withheld.
